Map 2.1—Producing, Extension, and New Field Areas in Mesaverde Subplay 2
Map 2.2—Distribution of Technically Recoverable Resource for Greater Green River Basin from USGS-Based Scenario
Map 3.1—Distribution of Economically Recoverable Resource at $3/MMBtu for Greater Green River Basin from USGS-Based Scenario
Map 4.1—Terrestrial Vertebrate Species Richness in the Greater Green River Basin
Map 4.2—Proximity to Sensitive Species Observed Locations in the Greater Green River Basin
Map 4.4—Proximity to Human Settlements in the Greater Green River Basin
Map 4.5—Surface Slope in the Greater Green River Basin
Map 4.6—Aquifer Recharge Rates in the Greater Green River Basin
Map 4.7—Depth to Initial Groundwater in the Greater Green River Basin
Map 4.8—Federal Land Lease Stipulation Categories in the Greater Green River Basin

SOURCE: Distribution of lease stipulations is taken from Advanced Resources International (2001).
Map A.1—Distribution of Technically Recoverable Gas in the Greater Green River Basin for the NPC-Inspired Advanced Technology Scenario
Map A.2—Distribution of Gas Economically Recoverable at $3/MMBtu in the Greater Green River Basin for the NPC-Inspired Advanced Technology Scenario
Map A.3—Distribution of Gas Economically Recoverable at $5/MMBtu in the Greater Green River Basin for the USGS-Based Scenario
Map A.4—Distribution of Gas Economically Recoverable at $7/MMBtu in the Greater Green River Basin for the USGS-Based Scenario
