
TABLES

S.1. Preferred Forms of GPS Governance	xxv
3.1. Current GPS Receiver Performance	50
3.2. Advanced GPS Receiver Anti-Jam Enhancements	51
3.3. Missile INS Quality	54
3.4. Ballistic Missile Capability of Selected Developing Countries	59
3.5. Characteristics of the Scud B and No Dong 1	60
3.6. Baseline Scud Accuracy	61
3.7. Baseline No Dong 1 Accuracy	61
3.8. GPS Position and Velocity Accuracy	62
3.9. GPS-Aided Ballistic Missile Cases	62
3.10. Pros and Cons of Selective Availability	87
4.1. Global GPS Market Projections	104
4.2. Estimated Average Sale Price of U.S. and Japanese GPS Products in the Year 2000	111
4.3. Top Assignees of International GPS Patent Families	117
4.4. Observed GPS Positioning Errors with Typical Receivers	119
4.5. Functions of Encryption	140
5.1. Ability of Institutional Options to Meet GPS Conditions	167
5.2. U.S. Expenses for Traditional Utilities and Major Civil Agencies	174
5.3. Example Revenues from U.S. Excise Taxes, 1994	174

5.4. Sample International Civil Organizations Affected by GPS	182
6.1. Preferred Forms of GPS Governance	212
B.1. Basic GPS System Costs (1974–2016)	267
B.2. GPS Costs Through 2016: Basic System, Launcher, and Nuclear Detection System	270
