APPENDIX A—COMPENSATION COMMITTEE SURVEY TABLES

This appendix includes tables with more complete data on the compensation committee survey results. These tables correspond to those presented in the body of the report. Other than the information presented in the main text, these tables contain the number of respondents for each item and choice category, percentages and associated standard errors (in the parentheses) by choice category or combined category, and the statistical significance of Chi-square tests to examine whether administrators and UFT committee members differed in their responses. Items with a P_{chi} value smaller than 0.05 are considered as having significantly different responses between administrators and UFT committee members. Caution is warranted when interpreting the significance of these tests because the large number of comparisons might have increased the probability of finding significant differences due to chance.

Table A.1. Percentage of CC Members Reporting on Guidance Received in 2009–2010

Area of Guidance		Did not receive		Received and it was ...				P_{chi}
		Total	%	Total Received	Sufficient: It met my needs	Somewhat sufficient: It partially met my needs	Not sufficient: I want more guidance	
		N	%	N	%	%	%	
How to identify strategies that maximize our chances of achieving a high Progress Report grade	All	540	20 (2)	482	72 (2)	24 (2)	4 (1)	0.75
	Admin	216	15 (2)	183	74 (3)	22 (3)	4 (1)	
	UFT	322	23 (2)	247	70 (3)	25 (3)	4 (1)	
How to communicate the goals of the SPBP to all staff	All	550	16 (2)	461	75 (2)	21 (2)	5 (1)	0.07
	Admin	219	11 (2)	194	80 (3)	15 (3)	5 (2)	
	UFT	329	19 (2)	265	71 (3)	24 (3)	5 (1)	
How to interpret Progress Reports	All	552	15 (1)	467	73 (2)	24 (2)	4 (1)	0.01
	Admin	221	9 (2)	202	80 (3)	18 (3)	2 (1)	
	UFT	329	20 (2)	264	67 (3)	27 (3)	5 (1)	
The criteria for winning a school bonus	All	546	15 (1)	466	72 (2)	22 (2)	6 (1)	0.47

	UFT	325	17	5 (1)	308	177	57 (3)	131	43 (3)				
I would rather have an individual performance-pay program than the SPBP	All	543	43	8 (1)	500	368	74 (2)	132	26 (2)	0.00			
	Admin	215	20	9 (2)	195	105	54 (4)	90	46 (4)				
	UFT	325	23	7 (1)	302	261	86 (2)	41	14 (2)				

NOTES: Statistically significant differences between Administrators and UFT staff are indicated by bold typeface ($p < 0.05$). Total numbers and percentage calculations for each item exclude those who responded "don't know."

Table A.3. Percentage of CC Members Reporting on the Bonus Distribution Plan in 2009–2010

Option					Ratings					
		Total	Don't know		Strongly Disagree (1) / Disagree (2)			Agree (3) / Strongly Agree (4)		P _{chi}
		N	N	%	Total	N	%	N	%	
I believe all UFT members should receive an equal share of the bonus because all staff make important contributions to the success of the school	All	534	15	3 (1)	519	190	37 (2)	329	63 (2)	
	Admin	209	5	2 (1)	204	103	50 (4)	101	50 (4)	
	UFT	322	10	3 (1)	312	86	28 (3)	226	72 (3)	
I am reluctant to consider anything but distributing an equal share of the bonus to all employees for fear that unequal distribution will negatively affect school climate	All	537	10	2 (1)	527	216	41 (2)	311	59 (2)	0.00
	Admin	211	2	1 (1)	209	110	53 (3)	99	47 (3)	
	UFT	323	8	2 (1)	315	106	34 (3)	209	66 (3)	
Most teachers in our school have communicated to me or members of the Compensation Committee that they are opposed to anything but an equal share distribution of the bonus award money	All	541	64	12 (1)	477	186	39 (2)	291	61 (2)	0.01
	Admin	213	38	18 (3)	175	74	42 (4)	101	58 (4)	
	UFT	325	26	8 (2)	299	111	37 (3)	188	63 (3)	
I believe staff with unsatisfactory evaluation ratings should receive less than others	All	530	50	9 (1)	480	219	46 (2)	261	54 (2)	0.00
	Admin	211	17	8 (2)	194	40	21 (3)	154	79 (3)	
	UFT	316	33	10 (2)	283	176	62 (3)	107	38 (3)	
I believe staff with exceptional performance should receive a larger share of the bonus than staff with lower levels of performance	All	539	21	4 (1)	518	323	62 (2)	195	38 (2)	0.00
	Admin	213	10	5 (1)	203	87	43 (3)	116	57 (3)	
	UFT	323	11	3 (1)	312	234	75 (2)	78	25 (2)	
I believe staff who do extra work at the school or work additional hours (e.g., tutor afterschool) deserve more than others	All	538	11	2 (1)	527	356	68 (2)	171	32 (2)	0.00
	Admin	211	8	4 (1)	203	101	50 (4)	102	50 (4)	
	UFT	324	3	1 (1)	321	253	79 (2)	68	21 (2)	

Table A.3. Continued

Option		Ratings									
		Total			Strongly Disagree (1) / Disagree (2)			Agree (3) / Strongly Agree (4)			P _{chi}
		N	N	%	N	N	%	N	%		
I believe staff who provide direct academic instruction to students (e.g., classroom teachers) should receive a greater share than other staff with indirect and non-academic support to students (e.g., counselors, nurses)	All	538	9	2	529	361	68	168	32	0.00	
	Admin	213	3	1	210	124	59	86	41		
	UFT	322	6	2	316	235	74	81	26		
We are likely to change the way we distribute the bonus this year from the distribution model our school's compensation committee developed last year	All	541	53	10	488	372	76	116	24	0.03	
	Admin	213	29	14	184	142	77	42	23		
	UFT	325	23	7	302	229	76	73	24		
I believe teachers in subjects and grades that impact Progress Report scores deserve more than teachers in the other grades and subjects	All	539	10	2	529	435	82	94	18	0.00	
	Admin	213	5	2	208	156	75	52	25		
	UFT	323	5	2	318	276	87	42	13		
I believe senior teachers who serve as mentors or school leaders deserve more than others	All	538	11	2	527	458	87	69	13	0.00	
	Admin	210	8	4	202	164	81	38	19		
	UFT	325	3	1	322	292	91	30	9		

NOTES: Statistically significant differences between Administrators and UFT staff are indicated by bold typeface (p < 0.05). Total numbers and percentage calculations for each item exclude those who responded "don't know."

Table A.4. Percentage of CC Members Agreeing or Strongly Agreeing to Statements about the Compensation Committee Process in 2009–2010

Option		Total			Ratings			P _{chi}			
		N	N	%	Strongly Disagree (1) / Disagree (2)		Agree (3) / Strongly Agree (4)		N	%	P _{chi}
					N	%	N	%			
I feel that my opinions and ideas were valued by other members of the committee	All	319	9	3	310	16	5	294	95	0.47	
	Admin	134	5	4	129	6	5	123	95		
	UFT	184	4	2	180	10	6	170	94

	2010	43	47	40	57	53	60	

NOTES: An ordered logit regression analysis was conducted on each item to examine whether the differences between 2008–2009 and 2009–2010 were statistically significant. The ordered logit model examined the effects of role and year and the interaction between role and year, with the adjustment for the clustered data by school. P-values represent the probability of finding statistically significant differences between two school years or between administrators and UFT members on a particular item. The first p-value is for the effect of year. The second p-value is for the effect of role. Please see Appendix A for more detailed results on these items.

NOTES: Total Ns and percentage calculations exclude respondents who responded “don’t know” to each item. * Percentages in these columns were calculated based on those who reported they had employed any of those listed school improvement strategies. Response options also included “caused us to focus significantly less on this area” and “caused us to focus slightly less on this area,” but only 0 to 2 percent of respondents in all categories selected these options. An ordered logit regression analysis was conducted on each item to examine whether the differences between 2008–2009 and 2009–2010 were statistically significant. The ordered logit model examined the effects of role and year and the interaction between role and year, with the adjustment for the clustered data by school. P-values represent the probability of finding statistically significant differences between two school years or between administrators and UFT members on a particular item. The first p-value is for the effect of year. The second p-value is for the effect of role. Please see Appendix A for more detailed results on these items.

Table A.13. Percentage of Teachers and CC Members Reporting Individual Changes Resulting from School Participation in SPBP (2008–2009 and 2009–2010)

APPENDIX B—TEACHER SURVEY TABLES

Table B.1. Percentage of Teachers Reporting Possible Factors Motivating Them to a Moderate or Great Extent to Work Hard

The possibility of ...	Ratings				
	Total	Not at all or to a small extent		To a moderate or great extent	
	N	N	%	N	%
Seeing my students learn new skills and knowledge	775	7	1 (0)	768	99 (0)
Seeing my students improve their performance	772	5	1 (0)	767	99 (0)
Seeing myself improve as a teacher	763	9	1 (1)	754	99 (1)
Achieving or exceeding our school's Adequate Yearly Progress target	781	176	23 (2)	605	77 (2)
Receiving a high Quality Review score	774	183	24 (2)	591	76 (2)
Achieving a high Progress Report score/grade	775	195	25 (2)	580	75 (2)
Receiving a financial bonus for meeting school goals	779	284	36 (2)	495	64 (2)
Gaining recognition from my school colleagues for helping to meet our school goals	773	281	36 (2)	492	64 (2)
Gaining recognition from parents, the media, and/or district leaders for meeting our school goals	770	290	38 (2)	480	62 (2)
Our school being designated for district or state intervention	691	249	36 (2)	442	64 (2)
Our school being closed or phased out	687	285	42 (3)	402	58 (3)
Receiving public criticism due to not achieving our school goals	729	412	56 (2)	317	44 (2)

Table B.2. Percentage of SPBP and Control Group Teachers Agreeing or Strongly Agreeing with Statements about Progress Reports and Rewards

Option				Ratings				
	Total	Don't know		Total	Strongly Disagree (1) / Disagree (2)		Agree (3) / Strongly Agree (4)	
	N	N	%	N	N	%	N	%
The SPBP is a nice way to recognize staff for their hard work but it does not influence the way I perform my job	774	10	2 (0)	764	81	10 (1)	683	90 (1)
I have a strong understanding of our school's Progress Report and what factors contribute to our school's score this year (2009-10)	779	16	2 (1)	763	127	16 (2)	636	84 (2)
Rewarding teachers based on test score gains is problematic because it is hard to relate gains in student achievement to the work done by teachers	777	38	4 (1)	739	127	18 (2)	612	82 (2)
The criteria for a school to get a SPBP bonus award relies too heavily on student test results	777	45	6 (1)	732	122	16 (2)	610	84 (2)
It would be helpful if staff knew at the start of the school year what the plans were for distributing the SPBP bonus award to individuals	779	51	6 (1)	728	122	16 (2)	606	84 (2)
All building personnel should receive an equal share of the bonus	778	35	4 (1)	743	261	36 (2)	482	64 (2)
I have a strong desire to earn a SPBP bonus award	775	29	4 (1)	746	275	36 (2)	471	64 (2)
Non-teaching staff should receive a smaller share of the bonus than teachers	777	76	10 (1)	701	263	38 (2)	438	62 (2)
The UFT-represented employees should have more than half of the representatives on the compensation committee	774	183	24 (2)	591	176	30 (2)	415	70 (2)
The SPBP method for awarding bonuses (based on Progress Report targets) is fair to all participating schools	773	123	16 (2)	650	304	46 (2)	346	54 (2)
The bonus amount is not large enough to motivate extra effort	776	99	12 (1)	677	383	56 (3)	294	44 (3)
The SPBP program guidelines should be altered to ensure that bonus awards only go to staff who truly contribute to student success	776	55	8 (1)	721	452	62 (2)	269	38 (2)
Non-teaching staff should not be eligible for a share of the bonus	777	69	8 (1)	708	528	74 (2)	180	26 (2)
I frequently talk with colleagues in my school about the SPBP	776	9	2 (0)	767	618	80 (2)	149	20 (2)

Table B.3. Percentage of Teachers Receiving Information About the Schoolwide Performance Bonus Program

Source	Total N	% yes
My school’s UFT representative/chapter leader	777	72 (2)
My school’s administrators	773	55 (3)
NYC Department of Education	771	30 (2)
UFT central office	769	30 (2)
NY Teaching Fellows or Teach for America	764	3 (1)

Table B.4. Percentage of Teachers Reporting Their Level of Understanding of SPBP Elements (2009–2010)

	I understand this...						
	Total	Not very well		Somewhat well		Very well	
	N	N	%	N	%	N	%
The source of funding for this program	778	435	56 (2)	262	34 (2)	81	10 (1)
Criteria for a school to receive a partial bonus	779	323	41 (2)	340	44 (2)	117	15 (2)
The amount of money our school would receive if we met 100% of our target	779	284	36 (2)	300	38 (2)	196	26 (2)
How a school compensation committee decides on a distribution plan for the bonus	778	268	34 (2)	312	40 (2)	199	26 (2)
The target our school needs to reach in order to earn a bonus this year	779	263	34 (2)	336	43 (2)	180	23 (2)
Criteria for a school to receive the full bonus	779	227	29 (2)	372	48 (2)	180	23 (2)
Which staff are eligible to receive a share of the schoolwide bonus	779	211	27 (2)	354	45 (2)	214	28 (2)

Table B.5. Percentage of Teachers from Schools That Earned Bonuses Agreeing or Strongly Agreeing with Statements About Bonus Awards

	Ratings				
	Total	Strongly Disagree (1) / Disagree (2)		Agree (3) / Strongly Agree (4)	
	N	N	%	N	%
Receiving my bonus share was a nice acknowledgement of my effort but did not influence the way I perform my job this year	615	49	8 (1)	566	92 (1)
I was satisfied with the amount I received	615	129	21 (2)	486	79 (2)
After taxes, the bonus amount I received felt insignificant	614	168	27 (2)	446	73 (2)
Teachers' preferences were taken into account when developing our school's bonus distribution plan	612	268	44 (2)	344	56 (2)
The distribution of bonus award dollars by our school's compensation committee was unfair	612	502	82 (2)	110	18 (2)

Table B.6. Percentage of Teachers Agreeing or Strongly Agreeing with Statements about Effects of not Receiving the Bonus

	Total	Ratings			
		Strongly Disagree (1) / Disagree (2)		Agree (3) / Strongly Agree (4)	
		N	%	N	%
Not receiving a bonus reduced my motivation to work harder this year	81	75	92 (3)	6	8 (3)
Not receiving a bonus energized me to improve my teaching this year	79	67	85 (6)	12	15 (6)
I am really not sure why our school did not earn a SPBP bonus	80	43	54 (7)	37	46 (7)
Teachers' preferences were taken into account when developing our school's bonus distribution plan	78	36	46 (5)	42	54 (5)
I was very disappointed that our school did not receive a SPBP bonus	81	32	39 (6)	49	61 (6)

Table B.7. Percentage of Teachers Reporting Individual Changes Resulting from School Participation in SPBP (2008–2009 and 2009–2010)

Option	Don't Know			Changed <i>significantly</i> (1) / slightly (2) for the worse			Did not change (3)		Changed <i>slightly</i> (4) / significantly (5) for the better

APPENDIX C—BONUS AWARD DISTRIBUTIONS FOR YEARS 1 AND 2

This appendix includes figures showing the distribution of Gini coefficients and the planned bonus award distributions for all schools participating in SPBP in years 1 and 2 of the program. The figures are analogous to Figure 5.2 in the main report. In each figure, the top panel displays each school's Gini coefficient with schools sort in ascending order of their Gini coefficients. The bottom panel of each figure summarizes the award distribution plan in each school participating in the SPBP by plotting the range in awards as a vertical light gray line with the upper end of the line at the maximum award and the lower end at the minimum award. For each school, the range from the 25th to 75th percentile in awards is plotted as the vertical black line (25th percentile at the lower end of the line and 75th at the upper end), and the median award is plotted using a "+" symbol. As shown in the figure, most schools do not have black vertical lines, indicating that a very large majority of the schools participating in the SPBP had no variation in bonus awards between the 25th and 75th percentile. For these schools, at least 50 percent of the staff were slated to receive the same bonus award amount if the school were to receive a bonus. In only a handful of schools (those with Gini coefficients over 20) was there a sizeable variation between the 25th and 75th percentiles.

Figure C.1. Gini Coefficients and Award Distributions by SBPB Schools for Year 1 of the Program

Figure C.2. Gini Coefficients and Award Distributions by SBPB School for Year 2 of the Program

APPENDIX D—STUDENT ACHIEVEMENT OUTCOMES

This appendix presents a comparison of the Progress Report scores (overall and component scores) for schools participating in SPBP (regardless of lottery status) and those not. We include this analysis to calibrate the scores of the SPBP participating schools. These might not provide valid estimates of the SPBP effect if the schools that declined to participate differ from other schools in ways that are related to the Progress Report. The appendix also includes a detailed description of the models used to estimate and test the effects of the SPBP program during the first three years of the SPBP. We also provide the coefficient estimates for all variables included in each model. Finally, we present the summary and detailed model tables for the adjusted ITT analysis.

Comparison of SPBP Participating to Other Schools

Table D.1 presents the results of an analysis comparing the average Progress Report scores for schools participating in SPBP each year to all other eligible schools that did not participate. Again, there are no statistically significant differences, and most differences are small. However, unlike the ITT analyses, nearly all the differences are positive. Hence, the schools that actually participated in the bonus program in a given year scored slightly higher on average than the other schools. However, the source of this difference cannot be attributed to participating in the program. The schools that chose to participate might score higher for reasons other than participation in the program.

Table D.1. Differences (Std Errors) Between SPBP Participating School and Other Pilot Schools' Progress Report Component and Overall Scores for all Schools for the 2007-08 to 2009-10 School Years^a

Progress Report Component Score	School Year		
	2007–08 ^b	2008–09 ^c	2009–10 ^d
Overall Score	0.75 (1.61)	1.76 (1.61)	1.31 (1.83)
Environment Category Score	0.1 (0.27)	0.25 (0.26)	0.1 (0.28)
Performance Category Score	0.25 (0.42)	0.23 (0.46)	0.38 (0.52)
Progress Category Score	0.26 (0.98)	0.91 (1.01)	0.88 (1.17)
Additional Credit	0.14 (0.28)	0.37 (0.33)	-0.05 (0.28)

NOTES: ^aData for the 2009-10 school year may be preliminary; 37 schools added to the SPBP pilot after randomization or removed by the UFT were not in the Progress Report data for any year. ^b10 SPBP and 10 schools not participating in SPBP during the 2007-08 school year are missing Progress Report Data. ^c17 SPBP and 14 schools not participating in SPBP during the 2008-09 school year are missing Progress Report Data. ^d15 SPBP and 12 schools not participating in SPBP during the 2009-10 school year are missing Progress Report Data.

Details on the ITT Analyses of Student Level Outcomes

For the Intent-to-Treat (ITT) analysis of SPBP effects on student achievement test scores, we estimated a linear regression model with an indicator for treatment (assignment to SPBP) various sets of student and school level covariates depending on which models specification was being used to test the SPBP effect or sensitivity of our estimates. The standard errors were cluster adjusted sandwich estimators that account for the potential clustering of scores of student attending the same school. The model used in the analysis is as follows:

$$Y_{ij} = \beta_0 + \beta_1(Treatment_j) + \beta_2x_{ij1} + \beta_3x_{ij2} + \dots + \beta_{k+1}x_{ijk} + r_{ij} \quad r_{ij} \sim N(0, \sigma^2)$$

where

i index student and j index school. Y_{ij} represents either a scale score or the standardized z-score for student i in school j . Treatment indicates whether a school was randomly assigned to

participate in the SPBP in 2006–2007, with 1 representing SPBP assigned schools and 0 representing control schools. The x_{ijk} denote values of k student or school level covariates depending on the specification possibly including free and reduced-price meal status, English language learner (ELL) status, eligibility for an individual education program (IEP), racial ethnic group, gender, retained in grade indicator, grade level, enrollment size, percentage of students eligible for free or reduce-priced meals, percentage ELL, percentage of students eligible for an IEP, percentage of students per race-ethnicity group (black Hispanic, Asian/Pacific Islander, American Indian/Alaska Native or other) and school level (e.g., elementary, middle etc.). ELL status, eligibility for an IEP, and retained in grade are available only for elementary, middle, and K–8 schools. Models for elementary and middle grade students also include indicators for the grade level. β s are the corresponding parameters for treatment, and the and student- and school-level variables. r_{ij} is the residual error term. The parameter of interest is

β_1 .

Tables D.6 through D.45 present the estimated coefficients for the models.

Tables D.2, D.3 and D.4 present the adjusted ITT estimates of the SPBP effects. Most are very similar to the unadjusted values presented in Chapter Seven.

Table D.5 presents the results of our analysis of the relationship between differentiation in bonus award plans and student achievement for students in grades 3 to 8 in year 3 of the study. The analysis tested five measure of the differentiation of the award plan: (1) the Gini coefficient for all UFT members; (2) the Gini coefficient for all teachers; (3) the Gini coefficient for all teacher or academic coaches; (4) the proportion of staff not receiving the modal bonus award their schools; and (5) an indicator for whether or not the school's responses on the Galaxy survey reported using individual performance as at least one factor for determining bonus awards.

NOTES: *, **, *** Estimates statistically significant from zero at the 5%, 1%, and .1% levels, respectively. The No Controls column does not include student- or school-level control variables. The Controls column includes the student level controls gender, race and/or ethnicity, English language learner status, special education status, free/reduced lunch status, retention flag, and grade level and the school-level controls include percentage of male students, percentage of students by race and/or ethnicity, percentage of free/reduced price lunch students, school size, and school-level. The referent categories are grade 8, white, female, white (%), female (%), K–8 schools, and Year 3. Four of the 323 in the elementary, middle, and K–8 sample were excluded from the analysis because they do not enroll students in at least one tested grade (grades 3-8). Standard errors appear in parentheses.

NOTES: *, **, *** Estimates statistically significant from zero at the 5%, 1%, and .1% levels, respectively. The No Controls column does not include student- or school-level control variables. The Controls column includes the student level controls gender, race and/or ethnicity, English language learner status, special education status, free/reduced lunch status, retention flag, and grade level and the school-level controls include percentage of male students, percentage of students by race and/or ethnicity, percentage of free/reduced price lunch students, school size, and school-level. The referent categories are grade 8, white, female, white (%), female (%), K–8 schools, and Year 3. Four of the 323 in the elementary, middle, and K–8 sample were excluded from the analysis because they do not enroll students in at least one tested grade (grades 3–8). Standard errors appear in parentheses.

NOTES: *, **, *** Estimates statistically significant from zero at the 5%, 1%, and .1% levels, respectively. The No Controls column does not include student- or school-level control variables. The Controls column includes the student level controls gender, race and/or ethnicity, English language learner status, special education status, free/reduced lunch status, retention flag, and grade level and the school-level controls include percentage of male students, percentage of students by race and/or ethnicity, percentage of free/reduced price lunch students, school size, and school-level. The referent categories are grade 8, white, female, white (%), female (%), K–8 schools, and Year 3. Standard errors appear in parentheses.

NOTES: *, **, *** Estimates statistically significant from zero at the 5%, 1%, and .1% levels, respectively. The No Controls column does not include student- or school-level control variables. The Controls column includes the student level controls gender, race/ethnicity, free/reduced lunch status, and indicators if gender or race/ethnicity was undefined. School-level controls include the percentage of male students, percentage of students by race/ethnicity, percentage of free/reduced price lunch students, school level and school size. The number of schools containing at least one student with valid test score information ranges between 31 (Chemistry, fall 2008) and 84 (ELA, spring 2008). Referent categories include non-free/reduced lunch status, white, female, non-free/reduced lunch status (%), and middle/high school. Standard errors appear in parentheses.

The Controls column includes the student level controls gender, race/ethnicity, free/reduced lunch status, and indicators if gender or race/ethnicity was undefined. School-level controls include the percentage of male students, percentage of students by race/ethnicity, percentage of free/reduced price lunch students, school level and school size. The number of schools containing at least one student with valid test score information ranges between 31 (Chemistry, fall 2008) and 84 (ELA, spring 2008). Referent categories include non-free/reduced lunch status, white, female, non-free/reduced lunch status (%), and middle/high school. Standard errors appear in parentheses.

Referent categories include non-free/reduced lunch status, white, female, non-free/reduced lunch status (%), and middle/high school. Standard errors appear in parentheses.

APPENDIX E—TEACHER OUTCOMES: EFFECT OF TREATMENT ANALYSIS MODEL

For the ITT analysis on teacher survey results, we conducted a two-level mixed-effects hierarchical modeling analysis on the 14 scale scores and order logistic (ologit) or logistic regression analysis on 26 items with robust standard errors, with an indicator for participation in SPBP and controlling for tested group, school grade level, and school-level demographic variables. School demographic variables included in the analysis include enrollment, percentage ELL, percentage of students who are eligible for an individual education program, percentage of black and Hispanic students, and percentage of economically disadvantaged students. The model used to analyze scale scores is as follows:

$$Y_{ij} = \beta_0 + \beta_1(Treatment_j) + \beta_2(Tested_{ij}) + \sum_{n=3}^{11} \beta_n(Z_{nj}) + u_j + e_{ij} \quad u_j \sim N(0, v^2) \quad e_{ij} \sim N(0, \sigma^2)$$

Where i index teacher and j index school. Y_{ij} represents a scale or item score for teacher i in school j . $Treatment$ indicates whether a school was randomly assigned to participate in the SPBP in 2006–2007, with 1 representing treatment schools and 0 representing control schools. $Tested$ indicates whether a teacher taught tested subjects, with 1 representing tested teachers and 0 representing untested teachers. Z_{nj} ($3 \leq n \leq 11$) represents school-level demographic variables, including grade level, enrollment size, percentage ELL, percentage of students eligible for individual education program (IEP), percentage of black and Hispanic students, and percentage of economically disadvantaged students. β_0 is the average scale score for non-tested high school teachers in the control group whose school had zero percent of ELL, IEP, black and Hispanic, and economically disadvantaged students. β_s are the parameters for treatment, tested, and school-level demographic variables. The parameter of interest is β_1 , which equals the differences between the mean responses for teachers teaching in schools assigned to SBPB and other teachers. u_j is the school-level residual error assumed to follow a normal distribution with a mean of zero and a variance of v^2 . r_{ij} is the individual teacher residual error following a normal distribution with a mean of zero and a variance of σ^2 .

For individual items, the following ordinal logistic regression model is applied.

$$\ln\left(\frac{P_{ijk}}{1 - P_{ijk}}\right) = \beta_{0k} - \beta_1(Treatment_j) - \beta_2(Tested_{ij}) - \sum_{n=3}^{11} \beta_n(Z_{nj})$$

where \ln denotes the natural logarithm function. p_{ijk} represents the probability that teacher i in school j chooses a response with values less than or equal to the k^{th} ($1 \leq k < K$) response category on an item with K response levels ($K=4, 5, \text{ and } 6$). β_{0k} is the log odds of being in category k or lower versus a higher category for non-tested teachers in high schools in the control group with zero percent of ELL, IEP, black and Hispanic, and economically disadvantaged students. β_s are the differences in the log odds of teachers choosing a higher category on an item between two groups of teachers defined by dichotomous variables (Treatment and Tested), the increase in the log odds with one unit change in a continuous covariate, and the difference in the log odds between elementary, middle, and K-8 and high school teachers, while the other covariates are held constant. The parameter of interest, β_1 , the log of the ratio of odds that teacher teaching in school assigned to SPBP chooses the higher category to the odds that other teachers would make that choice. Robust standard errors adjusted for teachers clustered within the same school were applied.

For dichotomous items, we fit the following logit regression model:

$$\ln\left(\frac{P_{ijy}}{1 - P_{ijy}}\right) = \beta_0 + \beta_1(Treatment_j) + \beta_2(Tested_{ij}) + \sum_{n=3}^{11} \beta_n(Z_{nj})$$

where \ln denotes the natural logarithm function. p_{ijy} represents the probability that teacher i in school j chooses the "Yes" option instead of "No" on a Yes/No item. β_0 is the log odds of non-tested high school teachers in the control group schools choosing "Yes". These schools have zero percent of ELL, IEP, black and Hispanic, and economically disadvantaged students. β_s are the differences in the log odds of teachers choosing "Yes" instead of "No" between two groups of teachers defined by Treatment or Tested, the increase in the log odds with one unit change in a continuous covariate, and the different in the log odds between elementary, middle, and K-8 and high school teachers, while the other covariates are held constant. Again, the parameter of interest is β_1 , the log of the ratio of the odds that teachers in schools assigned to SPBP endorse "Yes" compared with other teachers. Robust standard errors adjusted for teachers clustered within the same school were applied.

NOTES: ¹ The unit of enrollment used for analysis is hundred. ² School-level demographic files downloaded from the website of New York Department of Education provide percent of students eligible for free or reduced-price lunch for elementary, middle, and K-8 schools and percent of Title I students for high schools. ³ High school is the omitted category. ⁴ Because all high school respondents chose the same answer, the analysis on this item was conducted without the percent of Title I students and high school respondents.
