This report is part of the RAND Corporation research report series. RAND reports present research findings and objective analysis that address the challenges facing the public and private sectors. All RAND reports undergo rigorous peer review to ensure high standards for research quality and objectivity.
Support for Children with Special Educational Needs (SEN)

Sam Drabble

Prepared for the European Commission, Directorate-General for Employment, Social Affairs and Inclusion
The research described in this report was prepared for the European Commission, Directorate-General for Employment, Social Affairs and Inclusion.

RAND Europe is an independent, not-for-profit policy research organisation that aims to improve policy and decisionmaking in the public interest through research and analysis. RAND’s publications do not necessarily reflect the opinions of its research clients and sponsors.

Summary

Mutual learning and the sharing of best practice on the provision of support for children with SEN are lacking at the European level. This is complicated by a marked absence of pan-European data on the prevalence of SEN, attributable to varying definitions of SEN between countries and divergent methods of SEN identification. Correspondingly, there is a case to be made for a harmonised classification framework of SEN in Europe. A political consensus has emerged on the importance of inclusive education, reflected by a general trend towards placement of children with SEN in mainstream education, and away from special schooling. Many Member States have made good progress in developing coherent, localised and inclusive early intervention strategies, which provide for consultation with affected families. Information on the support mechanisms available to parents of children with SEN is incomplete, although examples of good practice exist for replication.
