BLOCK IX.2 FOOD CONSUMPTION EXPENDITURES

The question in this block aims to help checking the respondent's answer question 1 group A Block I. X. The consumption expenditures in a year could be estimated by the daily, weekly or monthly consumption expenditures. To obtain the yearly consumption, multiply the daily consumption with 365, the weekly consumption with 52 or the monthly consumption with 12. The consumption expenditure in this block is all expenditures for goods that have been consumed.

How to fill in:

Question 1: Rice. Write the value of rice that is purchased by the household. In this question is included received from another party and self produced. The stock that is handed to another party is not included in this question.

Question 2: Cassava: Corn and all types of flour, write the consumption expenditures for the secondary staple food such as cassava, sweet potato, corn, wheat flour, rice flour, tapioca and other flour.

Question 3 and 6 is clear enough

Question 7: Ready-made food and beverage. Write the consumption of ready-made food and beverage such as bread, cake, tinned/bottled food, tinned/bottled beverage and other type of beverages.

Question 8: Ready-made food outside the house. Write the consumption expenditures that are eaten outside the house such as in a restaurant, a stall and other places such as in a vehicle, in a cinema and others, including ready-made food bought and consumed inside the house.

Question 9: Cigarettes, tobacco. Write the expenditures for cigarettes (clove, white, cigar), tobacco, cigarette paper, betel leaves, areca nut, gambier and others.

Question 10: Cooking oil, butter. Write the expenditures for cooking oil (coconut oil, corn oil) butter, including the coconut fruit used for cooking.

Question 11: Other food consumption. Write all other food consumption such as crackers (shrimp crackers or chips), Soya bean sauce, shrimp paste, beverage substance (syrup, chocolate) and others.

Question 12: Total the questions 1 till 12 column (5) and compare with question 1 Block IX.1 (food), if both contents are not the same, ask the respondent once more, correct the answer until both answers match.

**BLOCK X. PURCHASE AND SELLING DURABLE GOODS
DURING THE PAST YEAR (thousand rupiahs)**

This block is used to record the purchase and selling of half durable goods and durable goods. All purchase and selling of durable goods are recorded in this block disregarding the value.

How to fill in:

The number of purchased goods and received from another party is written in Column 3. The value of goods purchased is written in column 4 and received from another party is written in Column 5.

The number of goods sold and handed to another party is filled into column 6. The value of sold goods is written in column 7 and those that are handed to another party are written into column 8.

The net values on the change of durable goods ownership is the total of column 4 and 5 subtracted with the total of column 7 and 8 is filled into column 9.

The value of materials used for self-made durable goods is written in the purchase column (column 4)

The change of durable goods ownership is aimed to the consumption and occurred during the referral period that is the past year. For example if during that period there was no purchase or handed from another party then Block X is not filled in. The durable goods that are used for consumption is written in Block X, and the business activities are written in Block XII, if the goods are used together then the classification depends on the most frequent usage.

Specifically for credit payment, if the interest cannot be moved then the whole credit value is considered as consumption, but if the interest could be separated the capital value is entered as consumption and the interest is written in Block VI question 1 b (paid interest).

**BLOCK XI. ADDITION AND DECREASE OF PRODUCTION TOOLS
DURING THE PAST YEAR**

This block records the information on the production tools that are used in the activities of a household industry

In order to determine whether the production tools has to be recorded in this block or not, use the following guide:

- The value of the production tools per unit is relatively larger compared to the output sector that uses it.
- The age of the production tools is over than a year
- The value usually decreases

If the production tools fulfill all criteria above it has to be recorded in this block. On the contrary if the production tools only fulfills one of the criteria above then it does not have to be recorded into Block XI.

If a good is listed as a durable good in Block X then it is no longer recorded as production tools in Block XI. The production tools such as a hoe, shovel and others similar used

for household usage only like cleaning the yard or the gutter is recorded as durable goods not production tools. On the contrary tools owned by the respondent and used for undertaking work/business such as a plough, shovel, building tools are recorded in Block XI.

In general the production tools that are asked is already classified based on each type of field of work. In order to ease the interview Block XI has to be related to the coding of the field of work in Block V.

How to fill in:

Column (2): Write the purchase value of production tools during the past year including major repairs, self-made and received from another party.

Column (3): Write the value of production tools during the past year, including the production tools that are handed to another party.

Column (4): Column (2) – Column (3).

Question 2d: Other production tool services such as washing machines (undertaking a launderette), sewing machines (undertaking a tailor) and others.

Question 3: Motorized vehicle/transportation mode such as a car, motorcycle, truck and others.

Question 4: Non-motorized vehicle/transportation mode such as a pedicab, bicycle, carriage and others

Question 5: Non-residential buildings are buildings used for undertaking business as a repair garage, office and others.

Question 6: Undertaking land such as land for agriculture, for offices and others.

Question 7: Others are production tools that have not been covered in the previous question

Question 8: Fill in the total of questions 1 till 7.

BLOCK XII. THE ADDITION AND DECREASE OF RESIDENTIAL BUILDING, LAND AND GOLD DURING THE PAST MONTH.

The objective of this block is to understand the modification of the net ownership of the residential building, land and gold bars, which occurred during the past year.

A residential building cover the residence owned by a household either occupied by themselves or another party. A residential building also includes other supporting facilities such as a swimming pool, tennis court and others that is located/not located in the residential surrounding. The land mentioned in this block is the land used for a residential building, because land used for undertaking a business is considered as a production tool of the related household.

The addition of a building could be through building a new one, purchase, or handed from another party. **The decrease** occur through selling or handing it to another party. Making a building, expanding/major repairs could be conducted either by the household itself or another party.

The value of this building covers all expenses for building materials, other expenses and the worker's wages. The expansion/major building reparation are only recorded if the usage of the building could be extended such as building renovation, additional storey, expanding rooms or building new rooms and others. Maintenance repairs such as a painting job or changing a broken roof-tile are not covered here. Land addition covers soil excavating, by purchasing or being handed by another party. Land decrease could occur caused by selling or handing out to another party.

How to fill in:

Column 2 and 3 : Write the addition and decrease of a residential building and other residential facilities based on the type of addition and decrease that occurred.

Column 4 : Write the change of land for residential building based on the types of changes that occurred.

Column 5: Write the change of gold bars based on the changes that occurred

Column 6: Total Column 2, Column 3, Column 4 and Column 5.

Question 6: $(Q1 + Q2 + Q3) - (Q4 + Q5)$.

BLOCK XIII. THE CHANGE OF STOCK OF THE HOUSEHOLD BUSINESS DURING THE PAST YEAR

This block covers the early stock and the last stock of goods related to all household business.

How to fill in:

Column 1: Fill in the code of type of business that is in Column 3 Block V.

Column 2, Column 4 and Column 6: Fill in the early stock of ready-made goods, semi-made goods and raw materials.

Column 3, Column 5 and Column 7: Fill in the last stock of ready-made goods, semi-made goods and raw materials.

Column 8: Fill in the total of Column 2, column 4 and Column 6

Column 9: Fill in the total of Column 3, Column 5 and Column 7

Column 10: Fill in the difference of Column 9 and Column 8

BLOCK XIV.1 FINANCIAL TRANSACTION DURING THE PAST YEAR

This block aims to gather information on the change of ownership of financial household belongings. If this block is related to the previous blocks, it shows that what is done by the household on their savings and how does a household finance the purchase of durable goods and semi-durable goods also what financial instruments does the household use to invest their savings.

The contents of this block are the flow value of the mutation of household financial during the past year counted since the enumeration, not the financial belongings (stock price) owned during enumeration. To calculate the financial flow of belongings could be done in 2 ways as follows:

1. Deduct the type of financial belongings during enumeration with the condition of the past year, example: Household A during enumeration had a *Tabanas (Tabungan Nasional = National Savings)* of Rp.100,000. A year ago the value of the *Tabanas* was Rp.25,000. So the financial flow of Household A is Rp75,000. Another example is Household B during enumeration owned 100 stock bonds with the value of Rp.1,000,000 (based on the purchase price). A year ago the household only owned 10 stock bonds that was purchased with the price of Rp85,000. So the financial flow of household B is 90 stock bonds with the price of Rp.915,000.
2. The total transaction that was conducted during the past year, for example if Household C during the past year has paid the credit for the house 12 x Rp.50,000, the financial flow that is recorded in the debt payment is Rp.600,000.

In order to cover all financial household transaction then this block has to be asked to all household members starting from the head of the household, wife, children and so on. Schoolchildren also conduct financial transaction such as save their money at school or in a bank.

The pages of this block are provided for 5 household members, if the number of household members are more than 6 people use additional pages or write on the back of the page by giving notes.
