## **CHAPTER I PREFACE**

### **1.1 GENERAL**

SUPAS95 aims to collect population data that covers the demographic and social economic characteristics. The enumeration was conducted in October 1995 all around Indonesia with the sample size of 206,484 households. The Urbanization Survey was conducted also in the capital city of province A with the sample size of approximately 4,000 people chosen from household members that were samples of SUPAS95.

Since 1995 the SUPAS data was pre tested in six type A provincial Statistic Office, the remaining was conducted at the Central (Bureau of Demographic & Manpower Statistics).

The decision to process SUPAS data at the type A provincial Statistic Office was based on :

- The data volume was large caused by the sample size that is also large compared to the limited number of workers who can process the data at the Bureau of Statistic.
- The processing mediums at the local areas have increased so the decentralization of data processing has to be urged.
- The type A provincial Statistic Office is considered able to solve problems on processing

In order that the SUPAS95 could be utilized as effective as possible by the developing planners also to obtain correct and reliable input, the produced data should be of the highest quality. One of the efforts to increase the data besides giving supervision during data collection at the field is checking the contents of the documents at the pre computer phase.

Checking the contents of documents at the pre computer phase is very important due to:

- The officers of SUPAS95 are statistic partners that are relatively inexperienced compared to the statistic workers. The checking of filling in and the procedures are highly needed in the pre computer process.
- The data recording in computers needs rapid time, due to the better the results of the checking at the pre computer phase the quicker the process of data recording could be done.

### **1.2 PREPARATION ON EDITING/CODING THE SUPAS95 DOCUMENTS**

There are two preparation activities that has to be done before the SUPAS95-S is checked by the pre computer editor which are:

- Receiving the documents from the field
- Batching the documents and group numbering

### **1.3 RECEIVING THE DATA FROM THE FIELD**

This phase is the activities of recording and checking the completeness of the documents from the field enumeration. Checked documents by the supervisors are sent to the Regency/Municipality Statistic Office to be checked once more and is checked once more then sent tot the Provincial Statistic Office. Documents received by the Provincial Office are checked. The document checked based on the Chosen Enumeration Sample Area SUPAS95 list where the chosen sample is in order based on the code which is the Regency/Municipality and the code sample number SUPAS95.

In order to maintain the orderliness, fluency and preciseness of processing in the province, all involved work units should work on the schedule that is established by the central. If the Provincial Statistic Office do not receive the documents on time, they are obliged to check and understand what was the cause. The Provincial Statistic Office should develop a monthly report on the activity process of SUPAS95 to the Central Bureau of Statistics c/o the Bureau of Demographic and Manpower Statistics. Based on this matter, a guide on the receiving list should be made.

The receiving list is made per Regency/Municipality and aims to check the completeness of the documents from each Regency/Municipality.

#### 1.4. BATCHING DOCUMENTS

After receiving and checking the completeness of the documents the available data the documents should be batched. The batching is based on which documents came first from each regency/municipality, in order to ease the processing at the editing/coding or data recording.

Batching is conducted by grouping approximately 3 (three) sample code numbers (NKS) that are close together by grouping them into one group (batch) which consists of documents that are from the same Regency/Municipality. If the Regency/Municipality could not be divided by 3, the last batch could be 2 or 4 sample code numbers (NKS). Each NKS consists of 16 documents, so each batch contains approximately 48 documents.

The usage of this batching list besides documenting the number of batches per Regency/Municipality and the number of households per batch, it can also be used to monitor the activities of editing/coding and data recording for each related Regency/Municipality. Based on the Monitoring List the activities of editing/coding and data recording the development of activities could be monitored each day.

The following example is the SUPAS batching list for the Province of East Java, Regency of Kediri. In this sample it shows that the documents for the Regency of Kediri could be classified into 13 groups, based on the NKS that are in each Sample List. The number of Batch 13 is the last batch number from the Regency of Kediri that consists of 2 NKS that are the total of 32 documents.

Example of : **Batching List also as a Monitoring List on the Activities of Editing/Coding and Data Recording of the SUPAS95 data (see p. 6)**

Activities:

Column (1): Batch Number is the serial number of the NKS classification for each Regency/Municipality that is completed with the characteristics on the total batches of the related Regency/Municipality. Batch number 01/13 shows that the batch is numbered 01 and the number of batches in the Regency are 13. The total batch per Regency/Municipality can be estimated from the total of NKS beginning with the first digit 2 that are in the sample list for each Regency/Municipality.

Column (2): NKS that are categorized into a batch where the first two digits are two (2), and the number between brackets are the total of households of each NKS.

Column (3): Total number of households of each batch.

Column (4) till Column (6): Editing/coding activity

Column (7) till Column (9): Data Recording Activity

To identify the document of each batch, characteristic/identity is needed. The characteristics could be made on a card or a piece of paper for each group.

Example: Identity Card for each batch

INTER CENSUS POPULATION SURVEY 1995	
PROVINCE	: EAST JAVA (35)
REGENCY/MUNICIPALITY	: KEDIRI (06)
BATCH NO.	: 01/13
SAMPLE CODE NUMBER	: 1. 20001 (16) 2. 21009 (16) 3. 21502 (16)
EDITOR	: DEWI
DATA RECORDING OPERATOR:	WIWIK

The Editor and the Operator of the data recording is based on the names in the Monitoring List of the editing/coding activities and the data recording. The characteristics are aimed to check directly are the documents in the batch are actually processed at the editing/coding and data recording phases. This is to avoid missing or duplication specifically on the activity of data recording.

The characteristic/identity of the above batch could be glued on a card tied up with ribbon that it used to tie up the documents per batch. If the Provincial Statistic Office does not have a card with ribbon the information should be glued on the upper stack of documents for each batch.

The checking of SUPAS95-S List is conducted from block to block with the sequence as follows:

## 1. BLOCK I: CHARACTERISTICS OF LOCATION

Check in this Block the identity of the list that has to be based on the SUPAS95 enumeration area (sample list).

Question (Q) 101,102,103,104: Province, Regency/Municipality, Sub Regent and Village. Check if the contents of the box are correct and based on the area code/sample list.

Q105: Area: Check if the codes that are moved into the boxes are correct. If the area is urban Code 1 is circled and if it is a rural area, Code 2 is circled.

Q106, 108, 109, 111: Is not processed

Q107 & 110: NKS & Serial number of Samples

Check if the codes that are moved into the boxes are correct and based on the sample list. The serial number of samples in one NKS are in a sequence : 01, 02 till 16.

Q112: Number of Household Members

Check if the codes that are moved into the boxes are correct. The contents have to be the same as the last serial number of Column (1) Block III and also has to be the same as the number of filled in pages of Block V.

Q113: Number of Migrant Households the Past 5 Years

The contents has to be the same as the filled in Q514

Q114: Number of Women Aged 10-54 Years Old Ever Been Married

The contents have to be the same as the number of filled in pages of Block VII.

Q115: Page Numbers that has the Contents in Q514

Check if the number of cross marks are the same as the number of filled in Q514 or the number of check marks has to be the same as the contents in Q113.

1. BLOCK II: CHARACTERISTICS ON OFFICERS (are not processed)

2. BLOCK III: HOUSEHOLD MEMBERS CLASSIFICATION

The classification of household members that covers 10 characteristic columns of household members, the contents are codes that has to be filled in for each household member that fulfill the criteria.

Column 1 till 5 is the basic characteristics that have the close relationship (consistency) between columns for each individual and has to be filled in for each household member. Each list has a maximum of 15 household members. If there are more than 15 people check the additional document and the serial number that has to begin with the number 16. Also check if the contents in Block I Q112 is the same as the last serial number of the household member.

Column (3): Relationship with Head of the Household

The first serial number is head of the household (Code 01), the number of head of the household can not be more than one. For the next household member, the relationship with head of the household is based on the serial number of the code in Column (3) and should begin with the smallest serial number based on the manual. If the relationship code with head of the household is not in a sequence, the list of contents has to be corrected by crossing out the serial number in Column (1) Block III and in Q501 (household member number). Change it with the new serial of household member number based on the sequence of relationship with head of the household.

Check the relation between Column (3), (4) and (5) with Block V Q505 and 506.

Example: Women ever been married aged 10-54 years

Relationship with Head of the Household (Column (3))	Sex Column (4)	Age Column (5)	Ever been Married Column (10)	Block V	
				P505	P506
2/4	2	≥ 10	1	≥ 10	2
1/3/4/8/9/10/11/12	2	≥10	1	≥10	2/3/4
6/7	2	≥21	1	≥21	2/3/4

Column (6), (7), (8) and (9):

Check the columns that are filled in, is it appropriate with the age in Column (5) which is less than 15 years old.

### 3. BLOCK IV: HOUSEHOLD CHARACTERISTICS

Q401: Household income source during the past year

The contents are one of the codes 1 till 4

Q402: The household owns an agriculture field

The contents are one of the codes 1 or 2. If Q402 = 1, Q403 has to be filled in. If Q402 = 2, Q403 is empty.

Q403: The dimension of agriculture field

The contents are in hectares (ha) and 2 numbers behind the coma. The contents are maximal

Q404: Type of Physical Building

The contents are one of the codes 1 or 3. Then ask the type of storied/non storied building which is coded 1 or 2.

Q405: Number of census building in this physical building has to be the same as the physical building occupied by this household.

Q406: Number of households in this census building has to be filled in based on the census building occupied by this household

Q407: Ownership status of this residence

The contents are one of the codes 1 till 6. If Q407 = ½ then Q408 has to be filled in. If Q407 = 3/4/5/6, then Q408 has to be empty. If Q407 = 6, the characteristics are other ownership of residence.

Q408: Ownership status on land of residence

The contents are one of the codes 1 till 3 or 6. If it is coded 6 there has to be other characteristic status.

Q409: Type of roof

The contents are one of the codes 01 or 07 or 96. If it is coded 96 there has to be other characteristic on type of roof.

Q410: Type of wall

The contents are one of the codes 1 till 3 or 6. If it is coded 6 there has to be other characteristic on type of wall.

Q411: Type of floor

The contents are one of the codes 01 till 06. If it is coded 96 there has to be other characteristic on type of floor.

Q412: Dimension of floor

There has to be 3 figures in square meters based on what it used by this household.

Q413: Dimension of building and yard

There has to be 4 figures in square meters, based on what it is used by this household. If Q404 = not a 2 storied building,  $Q413 \geq Q412$ .

Q414: Lighting that is used

The contents are one of the codes 1 till 4 or 6. If it is coded 6 there has to be other characteristic on type of lighting used.

Q415: Fuel used for cooking

The contents are one of the codes 1 till 5 or 6. If it is coded 6 there has to be other characteristic on type of fuel. If  $Q415 = 1$  then  $Q414 = 1$ .

Q416: Source of drinking water

The contents are one of the codes 01 or 06 or 96. If it is coded 96 there has to be other characteristic on type of drinking water. If  $Q416 = 2/3$ , then Q417 has to be filled in. If  $Q416 = 01/04/05/06/96$ , then Q417 has to be empty.

Q417: The distance of pump well to the nearest septic tank

Has to be filled in with 2 figures in square meters

Q418: Source of water for bathing/washing

Fill in one of the codes 01 or 06 or 96. If it is coded 96 there has to be other characteristic on other source of water. If  $Q418 = 1$  then Q416 can not be coded 05 or 96.

Q419: Place for bathing

The contents are one of the codes 1, 2, 3 or 6. If it is coded 6 there has to be other characteristic on type of place for bathing.

Q420: Place of toilet

The contents are one of the codes 01 or 08 or 96. If it is coded 96 there has to be other characteristic on type of place of toilet. If  $Q419 = 3$  then Q420 cannot be coded 1 or 2.

Q421: Ownership of household equipment

a till g has to be filled in with one of the code 1 or 2.

#### 4. BLOCK V: GENERAL CHARACTERISTIC OF HOUSEHOLD MEMBERS

<p><b>THE NUMBER OF BLOCK V HAS TO BE THE SAME AS THE NUMBER OF HOUSEHOLD MEMBERS RECORDED IN BLOCK III</b></p>
---

Q501: Name and Serial Number

Check if it is appropriate with the contents in Block III Column (2) and Column (1)

Q502: Relationship with head of the household

Check if is appropriate with the contents in Block III Column (3) and Column (3)

Q503: Sex

Check if it is appropriate with the contents in Block III Column (4)

Q504: Date, month and year of birth

The content for date is 01 till 31, if do not know fill in 99

The content for month is 01 till 12, if do not know fill in 99

The content for year the maximum is 95.

Q505:Age

Check if it is appropriate with the calculation based on the characteristics in Q504 and check if it is appropriate with the contents in Block III Column (5). If not appropriate the contents in Block III Column (5) has to be appropriate with the contents in Q505.

Q506: Marital status

The contents are one of the codes 1 till 4. Check the relation with Block III Column (10).

Block III Column (10)	P506
1	2/3/4
2	1

Q507: Religion

The contents are one of the codes 1 till 6. If it is coded 507 = 6 there has to be other characteristic on religion.

Q508: Nationality

The contents are one of the codes 1, 2, or 3. If Q508 = 1 then Q509 has to be filled in. If Q508 = 2/3 then Q509 has to be empty.

Q509A: Ever lived in other regency/municipality

The contents are one of the codes 1, or 2. If Q509A = 1 then Q510 has to be filled in. If Q509A = 2 then Q510 has to be empty.

Q509 and Q510: Code of province and regency/municipality

The contents are the code of province and regency/municipality which is appropriate with Attachment 1.

Q511: Duration of living in the village of the current residence

Has to be filled in and the contents has to be  $\geq$  Q505

Q512: Filter (see Q505)

If  $Q505 \leq 4$  is check marked (✓) in the box “AGE 4 YEARS OR UNDER” continue to Q501 for the next household member. If  $Q505 \geq 5$  is check marked in box “AGE 5 YEARS OR UNDER” continue to Q513.

Q513: Filter (see Q511)

If  $Q505 \leq 5$  is check marked (✓) in the box “AGE 5 YEARS OR OVER” continue to Q516 and Q514 and Q515 has to be empty. If  $Q511 \leq 4$  is check marked in box “AGE 4 YEARS OR UNDER” continue to Q514.

Q514: Place of residence 5 years ago

Check the relation between Q505, 511 and 514

Q505	Q511	Q514
$\leq 4$	Filled in	Empty
$\geq 5$	$< 5$	Filled in
$\geq 5$	$\geq 5$	Empty

Q515: The main purpose moved from the village 5 years ago

The contents are one of the codes 01 till 07 or 96. If the code is 96 there has to be other purpose.

Q516: School participation

The contents are one of the codes 1,2 or 3. If  $Q516 = 1$  then Q517 till Q520 has to be empty. If  $Q516 = 2/3$  then Q517 till Q520 has to be filled in.

Q517: Level of highest education ever attained/currently attended

The contents are one of the code 1 till 8

Check the relation between Q516, Q517 and age (Q505).

P516	P517	P505
2	1	5 – 20
2	2, 4	11 – 30
2	3, 5	14 – 40
2	6, 7, 8	17 – 60
3	2, 4	11 – 98
3	3, 5	14 – 98
3	6, 7, 8	17 – 98

Q518: Highest Grade/class attained

The content is one of the codes 1 till 8

Check the relation between Q517 and Q51

P517	P518
1	< 6 or 8
2, 3	< 3 or 8
4, 5, 7	< 4 or 8
6	< 2 or 8
7	< 7 or 8

Q519: Level of highest education attained and graduated

The content is one of the codes 01 till 09. Check the relation between Q516, Q517, Q518 and Q519.

If Q516 = 3 and the content of Q519 is subtracted with 1, then 518 has to be coded 8 (graduated).

Example:

Q518 = 8, Q516 = 3, Q519 = 5 then Q517 has to be coded 4.

Check the relation between Q519 with the age (Q505)

P519	P505
2	>11
3, 5	>14
4, 6	>17
7	>18
8	>19
9	>20

If Q519 = 1/2/3/4, then Q520 has to be empty. If Q519 = 5/6/7/8/9, then Q520 has to be filled in.

Q520: The field of studies

Check if the codes of studies are appropriate with Attachment 4

Example:

Q519: Vocational High School.....06

Q520: (Home Economics)

2	1
---	---

Q521: Able to read and write

The content is one of the codes 1, 2 or 3. If Q516 is coded 1 or Q519 is coded 01, then Q521 has to be filled in. If Q516 is coded 2/3 or 519 is coded 02 till 09, then Q521 has to be empty.

Q522: Mother Tongue used

The content is one of the codes 1, 2 or 3. If the circled code in Q522 is 1 or 3 then the content in the box is emptied. If the circled code in Q521 is 2 then the content in the box is appropriate to the code of the local language of each province in Attachment 5.

Example:

Local language.....2  
( Aceh Kluet )

0	0	6
---	---	---

Q523: Daily language used at home

The procedures of filling in is the same as Q522

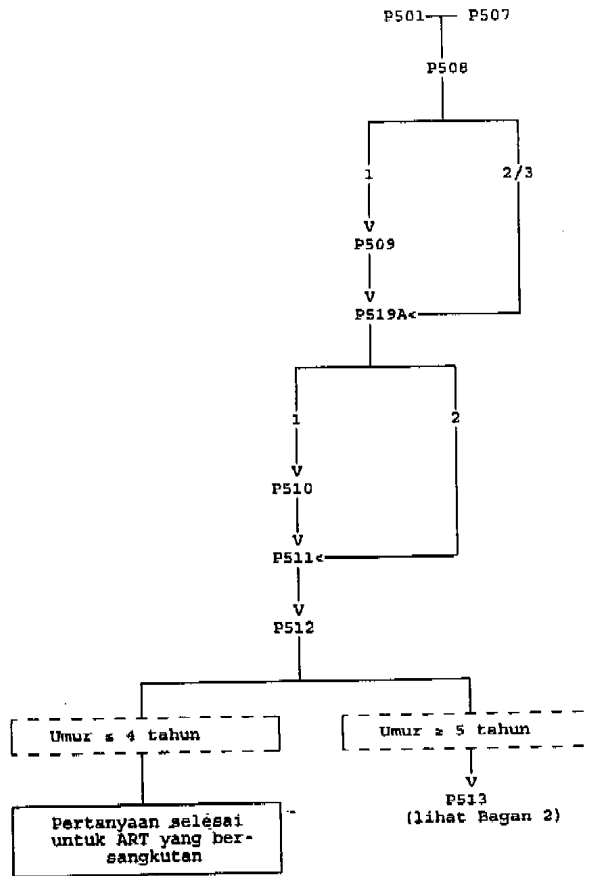

Q524: Can speak the Indonesian language

The content is one of the code 1 or 2.

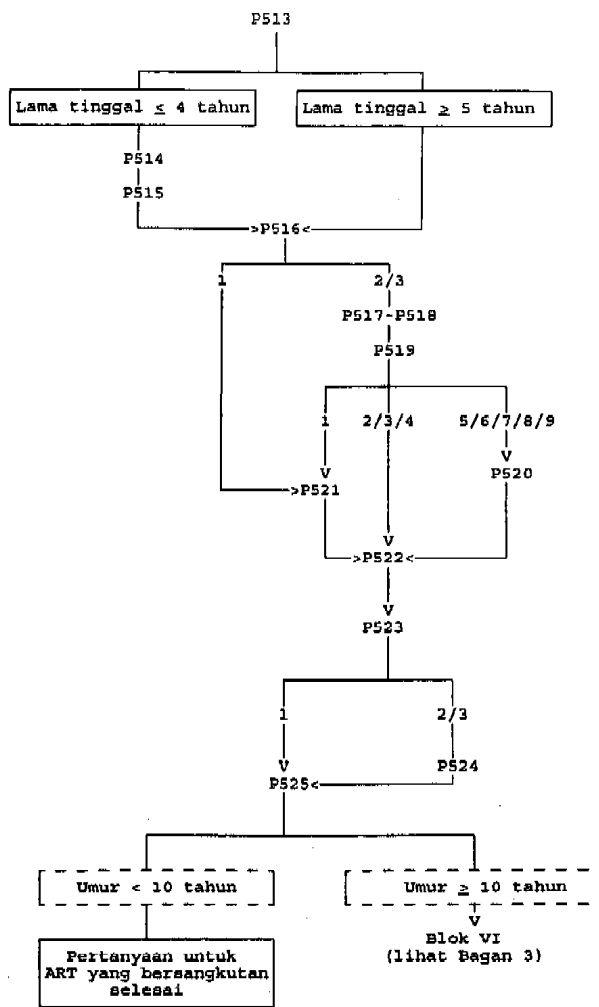

Q525: Filter (see Q505)

If Q505 < 10 is check marked (✓) in box “AGE UNDER 10 YEARS OLD” continue to Q501 for the next household member. If Q505 ≥ 10 is check marked (✓) in box “AGE IS 10 YEARS OLD OR OVER” continue to Block VI.

**BLOCK VI: ACTIVITIES OF HOUSEHOLD MEMBERS AGED OVER 10 YEARS OLD**

Q.601 till Q.615 is filled in if the age in Column (5) Block III  $\geq$

Q601: The most frequent activities conducted a week ago

The contents are one of the codes 1 till 3 or 6.

If Q601 = 1, then Q602, Q603 has to be empty

If Q601 = 2/3/6, then Q602 has to be filled in

If Q601 = 2, then Q516 = 2

If Q601 = 2, Q516 is not 2 then Q601 = 6

Q 602: Works at least 1 hour a week ago

The content is coded 1 or 2

If Q602 = 1, Q603 has to be empty

If Q602 = 2, Q603 has to be filled in

Q603: Temporarily is not working a week ago

The contents are one of the codes 1 or 2.

If Q603 = 1, then Q604, till Q608 has to be filled in

If Q603 = 1, and Q604 is empty (-) fill in 00, and the total number of working days = 0

If Q603 = 2, then Q604 till Q611 has to be empty.

Q604: Total working hours of the whole job a week ago

Has to be filled in if Q601 = 1, or Q602 = 1, or Q603 = 1.

This Question consists of 2 contents, the first content is the number of working days that is filled in the first box and the second content is the number of working hours filled into 2 boxes located under the box of working days.

The contents of working days are between 0 till 7, and the contents of number of working hours are between 00 till 95, and if the total is  $>95$  fill in 95 inside the box.

Check the relation between Q601, Q602 and Q604.

If Q601 = 1, the maximum of total working hours per day is 24 hours. The tolerance for working 1 day -24 hours is as long as 3 days in a week.

P601	P604		Characteristics
	Work days	Range of working hours	
1	3	3 – 72	Maximum 72 hours
1	4	4 – 95	Maximum 95 hours

Example:

1	2	3	4	5	6	7	5
1.5	2.0	0.5	-	2.5	2.0	2.0	1 0

The third day is not totaled because the working hours are less than 1 hour. So in this case the numbers of working days are 5 days and the number of working hours are 10 hours.

If Q602 = 1 then the maximum number of working hours per day is 8 hours. The working days in a week are 7 days so the maximum number of working hours in a week is 56 hours.

Q605: Number of working hours of main job during the past week

The content of Q605 has to be less or the same as the content in Q604.

Q606: Type of main job a week ago

The coding for type of job/work is based on the Indonesian Classification of Occupation. The contents are in 2 figures (see Attachment 3).

Example: Doctor.....06  
Administrative worker.....39

Q607: Field of main business a week ago

The contents are in 2 figures (see Attachment 2).

Example: Freshwater fishery.....18

Q608: Status of main work a week ago

The content is one of the codes 1 till 5. If Q608 = 1/2/3 then Q609 has to be empty. If Q608 = 4 then Q609 has to be filled in.

Q609: Average monthly salary/wages received

This question consists of 2 contents. First is the salary/wages in-cash and secondly is salary/wages in goods.

Example:

In cash : Rp.150,000,-

0	0	1	5	0	0	0	0
---	---	---	---	---	---	---	---

In goods : Rp.

--	--	--	--	--	--	--	--

Please pay attention on salary/wages that are too high. Check once more the documents then relate with the age, education attained, type of work and salary.

Q610: During the past week obtained additional work

The content is code 1 or 2. If Q610 = 2, then Q611 is empty. If the content of Q604 (total working hours) >Q605 then Q610 has to be coded 1.

Q611: Field of main additional work

The content is one of the codes 01 till 09 or 96. If it is coded 96 there has to be other characteristic on the field of main additional work.

Q612: Currently seeking for a job

The content is Code 1 or 2. If Q612 = 1 then Q613 and Q613A has to be empty.

Q613: Main purpose is not seeking for a job

The content is one of the codes 1 till 6. If the code is 6 there has to be other characteristic on the purpose of not seeking for additional work.

Q613A: Do you want to receive a job

The contents are codes 1 till 6. If Q612 is coded 1 then Q613 and Q613A has to empty. If Q612 is coded 2 then Q613 and Q613A has to be filled in.

Example:

Q.601/Q.602/Q.603	Q.604-Q.612	Q.613	Treatment
Q.601/Q.602/Q.603 = 1	Filled in	5	Q.613 = 6
Q.601 = 2	Filled in	5	Q.613 = 3
Q.601 = 3	Filled in	5	Q.613 = 4

Q614: Worked during the past year

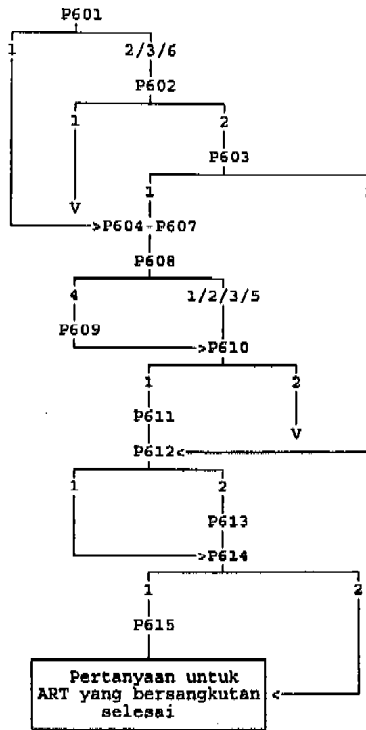

The code is 1 or 2. If Q614 = 2, directly go to Q501 for the next household members. If Q614 = 1 then Q615 has to be filled in.

Q615: The field of business during the past year

The contents are in 2 figures (see Attachment 2)

Kolom (5) Blok III  $\geq$  10 tahun

## BLOCK VII: WOMEN AGED 10 – 54 YEARS EVER BEEN MARRIED

<b>Column (10) Block III Code 1 is circled</b>
--

Q701: Name and serial number

Check if it appropriate to the content in Block III Column (1) and (2)

Q702: How many times were you married, mam?

The content is between 1 till 25.

Q703: In what month and year was your first marriage, mam?

Fill in the month between 01 till 12.

Fill in the maximum year is 95.

If does not know the month fill in 99

The year has to be estimated (see the enumeration manual)

- Check the relation between Q703 with the year of the mother's birth (Q504) which is  $Q703 \text{ (years)} - Q504 \text{ (years)} \geq 10$ .
- Check the relation of Q703 with the month and year of the first live born child. If the first marriage and month of the first live born child is filled in, the minimal difference are 9 months. If one of the months is not known, the difference of the year of first live born child and the first marriage minimal is 0 year.

Q704: At what age did you marry for the first time, mam?

- Check the relation of Q704 with Q703 and Q504 (year of mother's birth) which is  $Q704 = Q703 \text{ (years)} - Q504 \text{ (years)}$

- Check the relation of Q704 with the age of first live born child (Q715) that is:  $Q704 - Q715 \geq 10$

Q705: At what age was your husband (latest) married for the first time?

If there is no contents write 99.

Q706: Have you ever given birth?

Fill in the code 1 or 2. If Q706 is coded 2, the question for the respondent is over.

Q707: How many biological sons and daughters are living with you, mam?

If there are no biological sons or daughters that live together with there mother write 00.

Q708: How many biological sons and daughters are still alive but are not living with you, mam?

If there are no biological sons or daughters that live together with their mother write 00.

Q709: How many biological sons and daughters have passed away?

If there are no biological sons or daughters that have passed away write 00.

Q710: Number of biological children ever born alive

Check if the total number of children born alive is correct which is:

$$Q710 = Q707 + Q708 + Q709.$$

Q711: What are the names of children born alive (eldest , second, so on)

Check if the serial number is appropriate with the number of children ever born alive (Q710)

Q712: Sex of children born alive

The content is 1 or 2

Check the relation of Q712, Q707, Q708 and Q709.

- Number of Code 1 in Q712 has to be the same as the total number of sons in Q707, Q708 and Q709
- Number of Code 2 in Q712 has to be the same as the total number of daughters in Q707, Q708 and Q709

Q713: Month and year of birth children born alive

The content for month is 01 till 12.

The content for year is maximum 95.

If the month and year of birth is not filled in write 99. Check if between the birth of the first live born child and the second and third and so on minimally is 9 months. If the month is empty the interval of birth minimal is 0 year.

Q714: Is the child still alive?

The content is Code 1 or 2.

Check the relation between Q709 and Q714.

- If Q709 = 0, Q714 is not coded 2
- If Q709 is filled in (>0) then the number of Code 2 in Q714 has to be the same as the content in Q709
- If Q714 = 2, Q715 has to be empty

Q715: How old is the child's age?

Check the relation between Q715 and Q713.

Q716: How old was the child when he/she passed away?

- Fill in months if the child died < 2years
- Fill in years if the child died  $\geq$  2 years

Write down the month and year of each child without paying attention whether the child is still alive or has passed away. If the respondent does not use the month and year of a Roman Calendar, write the month and year in the empty space of Block VII then convert to the Roman Calendar using the conversion table (Book 4). Example if the daughter was born in 1974 but the month was unknown, ask if the child was born before or after *Lebaran* (Muslim day) then try to obtain the exact name of the month. The enumerator has to convert the name of month into numbers. If the month could not be figured out write "98" for the month. **The year of birth has to be filled in although only predicted.**

#### **Question 714: Child Survival Status**

Circle Code 1 if the child is still alive and continue the interview to Q715. If the child has passed away circle Code 2 and continue the interview to Q716.

#### **Question 715: Age of Child**

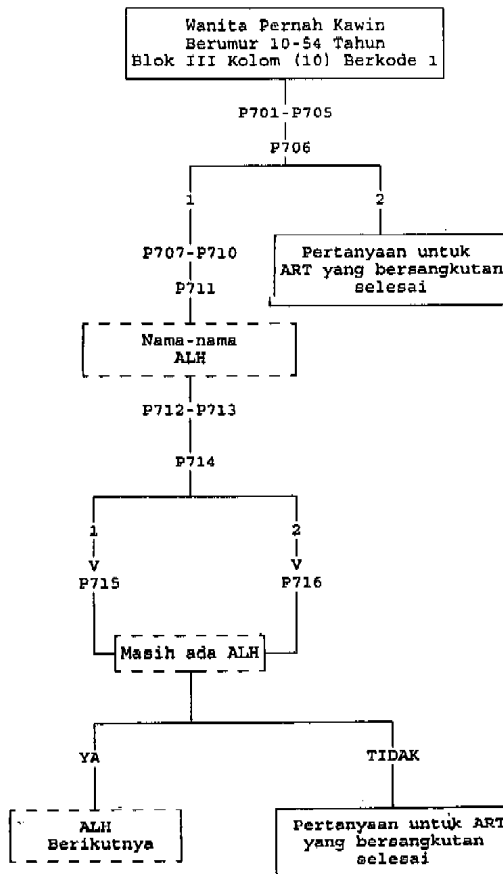

**This question has to be answered for all born alive children.** The age of the child has to be consistent with the month and year of birth written in Q713. If there are any difficulties for this question, see the elaboration for Q304.

#### **Question 716: Age of Child when passed Away**

Write the age of the children that has passed away although only estimated. The characteristic on age when passed away is recorded in months or years. If the age has not reached 2 years, circle Code 1 and write down the answer in months. If aged over 2 years old circle Code 2 and write the answer in years.

Write the answers in rounded numbers. Example: respondent said 4 1/2 months, write "04" besides the MONTHS. If the respondent gives answer in weeks decide if the age is more than a month (4 weeks)
