## **RESEARCH GRANTS AND FELLOWSHIPS RECEIVED**

### **Past**

Developmental Grant Medical College of Wisconsin	Bogart (PI)	1998
The goal was to examine the impact of medical and non-medical patient factors on prescription of antiretroviral treatment for people living with HIV. Role: MPI		
Grant-in-Aid	Bogart (PI)	2000
Society for the Psychological Study of Social Issues; Relationship of Perceived Health Care Discrimination and Stereotypes About Physicians to Health Care Status and Behaviors Among African American Adults		
The goal was to examine associations of stereotypes about physicians to health care satisfaction, help-seeking behavior, and treatment adherence among African Americans.		
R03MH62283 NIMH	Bogart (PI)	2000-2003

### Cognitive Strategies Used to Recall High Risk Behaviors

The goal was to conduct a methodological investigation to identify cognitive strategies that individuals use when providing retrospective self-reports of sexual behavior.

R01HD42397  
NICHD

Thornburn Bird (PI)

2002-2005

#### Conspiracies, Perceived Discrimination & Sexual Behavior

The goal of the project was to conduct a national, cross-sectional, anonymous telephone survey of African Americans to examine effects of belief in conspiracies related to HIV and birth control, and perceived discrimination when getting family planning or contraceptive services on attitudes toward condoms and other contraceptive methods, sexual behavior and intentions, and use of contraceptive services.

Role: Co-I

U65/CCU924523-01  
CDC

Asch, Bogart (Co-PIs)

2004-2008

#### Evaluation of the Use of Rapid HIV Testing in the U.S.

This project evaluated the ways in which rapid tests for HIV are implemented in private settings, and identified ways to assist testing sites in the appropriate use of rapid tests.

U01DK 070234-01  
NIDDK

Berry (PI)

2004-2009

#### Epidemiology of Interstitial Cystitis/Painful Bladder Syndrome

This study established a case definition for interstitial cystitis (IC), developed and validated a symptom questionnaire to conduct a prevalence survey for IC symptoms; developed IC-specific measures of quality of life and functional status; and described the impact of IC on patients' lives.

Role: Co-PI

R21NR010284  
NINR

Bogart (PI)

2006-2009

#### Evaluation of Treatment Advocacy in Involving Patients in HIV Care

In this community-based participatory research study, researchers collaborated with APLA Health to conduct a process evaluation of APLA Health's treatment advocacy program.

R01MH072351  
NIMH

Bogart (PI)

2006-2011

#### Discrimination, Health Care Attitudes, and HIV Treatment

This longitudinal study investigated perceived stress and negative health care attitudes as possible barriers to antiretroviral treatment adherence and safer sexual behavior among African American men living with HIV. A supplement study examined similar issues among Latino men.

U48 DP000883  
CDC

Bogart (PI)

2007-2010

#### Understanding Motivators and Barriers for Changing Sugar-Sweetened Beverage (SSB) Intake

among Overweight and Obese Youth

This project consisted of qualitative interviews with 60 overweight/obese Latino youth and their caregivers to explore patterns of purchasing, availability, and consumption of SSBs, and examine social-cognitive and environmental influences for keeping SSBs.

P30AI060354 Bogart, Mimiaga (Co-PIs) 2010-2012  
Harvard University Center for AIDS Research  
Antiretroviral Medication Adherence among HIV-Infected Youth  
The research aimed to develop and pilot test an intervention to improve antiretroviral medication adherence among adolescents/young adults with HIV.

RC4HD066907 Schuster (PI) 2010-2013  
NICHD  
Establishing an Academic-Community Partnership to Promote Child Health in Boston  
The Boston Children's Hospital Center for Collaborative Community Health Research (C-CORE) built participatory community-academic research partnerships to improve child health research and community research capacity in Boston.  
Role: Co-I/Associate Director

R01HD050150 Derose (PI) 2008-2014  
NICHD  
Urban Congregations' Capacity for HIV Prevention & Care  
This project developed and conducted a pilot intervention to reduce HIV stigma and increase HIV testing in African American and Latino faith-based organizations.  
Role: Co-I

R34MH090790 Bogart (PI) 2010-2014  
NIMH  
A South African Pilot Worksite Parenting Program to Prevent HIV among Adolescents  
The goal of this project was to adapt a US-developed worksite-based program for parents of adolescents to two cultures in South Africa and to examine the program's feasibility and preliminary effects on parent-child communication about HIV and sexual risk.

R01MD003964 Bogart (PI) 2009-2015  
NIMHD  
Medical Mistrust, Social Networks, and Disparities in HIV Care among Blacks  
This project aimed to identify social network sources of HIV-related information among African Americans with HIV; examine ways in which social network characteristics related to HIV mistrust are associated with HIV treatment behaviors; and partner with community stakeholders to identify novel interventions to address mistrust and improve HIV treatment behaviors for Black/African Americans living with HIV.

R01MH090326 Bassett (PI) 2010-2015  
NIMH  
Linkage & Retention: A Randomized Trial to Optimize HIV/TB Care in South Africa  
This study was a randomized controlled trial of a health system navigator intervention to

improve linkage to HIV and TB care among newly-diagnosed HIV-infected outpatients in Durban, South Africa. A supplement (funded in 2013) examined the long-term impact of transfer to other care sites in the same cohort as the parent grant.

Role: Co-I

P30AI060354 Walker (PI) 2014-2015

NIAID

Harvard University Center for AIDS Research (HU CFAR)

The HU CFAR's mission is to expand, promote and facilitate collaborative innovative multidisciplinary activities in HIV/AIDS research to bring an end to the epidemic.

NIMH

Community HIV Testing and Linkage to Care in Uganda

This project used mixed methods to explore barriers to community HIV testing in fisherfolk communities; to develop a linkage-to-care intervention that is integrated into post-test counseling; and to conduct a small feasibility test of the intervention. A supplement (3R21MH098657-02S1) was awarded to implement and evaluate home-based HIV testing on one island in Lake Victoria, with the goal of increased awareness of sero-status and consequent linkage to care.

R24MD001648 Schuster (PI) 07/26/08-02/29/17

NIMHD

A Community-Academic Partnership to Address Disparities in Obesity Among Youth

This study developed, evaluated, and disseminated a multi-level intervention to promote healthy eating and physical activity among middle school students, using community-based participatory research principles.

Role: Co-PI

R34MH096544 Bogart (PI) 08/01/12-05/31/17

NIMH

Pilot Intervention for Discrimination and Mistrust Among HIV Positive Black Men

This project developed and pilot tested an intervention to improve coping skills for discrimination and reduce mistrust among HIV-positive Black MSM. A supplement examined these issues in immigrant Latino men.

R01MD006058 Bogart (PI) 05/01/11-12/31/17

NIMHD

Treatment Advocacy Intervention for HIV-Positive African Americans

This community-based participatory research study is a randomized controlled trial of a culturally relevant treatment advocacy intervention for African Americans living with HIV.

RWJF73587 Cohen (PI) 06/01/16-06/30/18

Robert Wood Johnson Foundation

Evaluating the Balance Calories Initiative of the American Beverage Association and Alliance

for a Healthier Generation

This study evaluated the effects of the American Beverage Association's Balance Calories Initiative using sales data, food establishment observations, semi-structured interviews, and street-intercept surveys.

Role: Co-I

R21MH107454 Bogart (PI) 09/14/15-07/31/18
