

RAND Europe is a not-for-profit research organisation that helps to improve policy and decision making through research and analysis. Our findings and recommendations are based on rigorously peer-reviewed research and analysis. We aim to benefit the public interest through the impact and wide dissemination of our work.

With legal entities in Cambridge UK and Brussels BE, we work with a range of clients, including European governments and institutions, charities, foundations, universities and private sector firms that seek impartial, quality-assured research. We combine deep subject knowledge with proven methodological expertise across many policy areas.

Excellence, impact, diversity and innovation are important to us since these characteristics speak to the quality of our research.

EXCELLENCE

- RAND Europe is not-for-profit. Our research is empirical, objective and non-aligned to political or special interests.
- All of our work is quality assured and peer reviewed, reaching a standard others seek to emulate.
- RAND Europe's Council of Advisors represents a body of distinguished experts in their fields.

IMPACT

- RAND Europe combines intellectual rigour with practical actionable solutions.
- Our research contributes to tangible changes in policy, processes and methods. It shapes policy agendas and informs debates.
- Our clients trust us to be a source of quality, objective policy research in Europe.

DIVERSITY

- Our staff are multinational, multilingual and cover 30 academic disciplines. Our interdisciplinary approaches to research generate unique perspectives and insights.
- Research expertise covers topical areas including health and well-being, criminal justice, defence and security, science and innovation, employment and social policy, education and transport.
- We draw on the expertise of collaborators. For example, RAND Europe and the University of Cambridge are partners of the Cambridge Centre for Health Services Research.

INNOVATION

- RAND Europe brings fresh approaches to tackle complex questions by establishing new angles of enquiry and new methodologies for research.
- We self-fund research to explore 'horizon' issues requiring exploration but lacking contract funding.
- As part of the RAND Corporation, we build on critical thinking and innovative methods that have evolved over the past 70 years.
