This product is part of the RAND Corporation documented briefing series. RAND documented briefings are based on research briefed to a client, sponsor, or targeted audience and provide additional information on a specific topic. Although documented briefings have been peer reviewed, they are not expected to be comprehensive and may present preliminary findings.
Assessing the U.S. Air Force Unified Engagement Building Partnerships Seminars

Jennifer D. P. Moroney, Jeffrey Engstrom

**Summary**

USAF’s UE BP Seminars, managed by its wargaming division (AF/A5XS), are designed to support the USAF’s biannual Title 10 wargame, Unified Engagement. These seminars focus primarily on incorporating the insights of countries that do not formally participate in the larger wargame by eliciting their reaction to a number of supporting scenarios through tabletop exercises during the seminars. To date, BP Seminars have taken place only in the areas of responsibility of the U.S. Air Forces in Europe and U.S. Pacific Air Forces.

We used RAND’s security cooperation assessment framework to assess these seminars. This framework looks at six specific elements: guidance, programs, authorities, stakeholders, levels of analysis, and indicators and metrics for assessment. With it, we assessed the seminars held in Sweden in 2009 and in Estonia in 2010. Both seminars successfully strengthened cooperation among the United States and its partners in the Baltic region. However, in applying the framework, the RAND team identified several ways to significantly enhance the BP Seminars:

- As with similar programs, the BP Seminars could benefit from the institutionalization that authoritative documentation, such as an Air Force instruction, would provide.
- Establishing clearer links to combatant command guidance would, among other things, provide measurable objectives for each seminar. Such objectives are critical for post-seminar assessments.
- Cost reduction is possible through both identifying and involving other potential stakeholders at the outset of planning a future BP Seminar.
- After-action reports would be highly beneficial for capturing seminar insights, honing the relevance and value of future events, and demonstrating the importance and effectiveness of the BP Seminars to critical stakeholders.
- Developing and implementing a follow-up mechanism, such as post-event interviews and participant surveys, would be invaluable for assessing the extent to which an event met its objectives, necessary areas for follow-up, and how to tailor future events.
- Most of these suggestions would not be difficult to incorporate into the BP program architecture if introduced early stage in the event-planning process. Implementing them will help increase the program’s visibility and effectiveness, reduce its costs, and further demonstrate its value within USAF and to U.S. partners worldwide.

Finally, this briefing also demonstrates the application of RAND’s security cooperation assessment framework and further affirms its utility and broad applicability to partnership building programs managed by USAF.
