1.1. Employment-Driven Analytical Framework ........ 5  
2.1. Spin-Up Time as a Function of Resource Location ... 8  
2.2. Deployment Footprint as a Function of Resource Location ........................................ 9  
2.3. Cost of Heavy Bomb Bodies “Invested” in Each Support Option .................................... 10  
2.4. Tradeoff Between Spin-Up Time and Investment Cost ................................................. 11  
2.5. Small Munitions Characteristics ...................... 12  
2.6. Effect of the Small Smart Munition on Spin-Up Time and Deployment Footprint .............. 13  
2.7. Personnel Deployment Requirements for F-15 Avionics Support Options ......................... 14  
2.8. Empirical and Theoretical Resupply Times for Various DoD Transportation Channels ......... 17  
3.1. Cost/Timeline Resource Allocation Tradeoff ....... 22  
4.1. Notional Global ACS Network .......................... 26  
4.2. A Notional FOL/FSL Configuration to Support the Caucasus Region ............................ 27  
5.1. A Structured Modeling Framework for Integrated ACS/Mobility Decisions ...................... 30  
5.2. Notional Tradeoff Analysis ............................ 31
