
ACKNOWLEDGMENTS

The RAND biometrics team owes much to the many people who helped us with this report, from those who tutored us on the technologies to those who participated in the workshop, and all who gave generously of their time to answer our questions and provide insights. In particular, we thank Steve Goldberg of Georgetown University Law Center, Peter T. Higgins of Higgins and Associates, David Mussington of RAND, and James L. Wayman of the National Biometric Test Center for their comments on various aspects of this draft; Kristina Larson and Shirley C. Woodward for their thoughtful contributions to our effort; our colleagues, Elisa Eiseman and Priscilla Schlegel of RAND, for their expertise and timely inputs; Dan Sheehan of RAND, for his careful edits; and Nykolle Brooks and Jessica Boyd of RAND, for their help in putting this document together. Any errors, of course, are the responsibility of the authors alone.
