### TABLES

1.1. How DL Could Help Address Three Levels of Readiness ........................................ 4
2.1. Identifying Personnel Shortages Using the Critical MOS List ............................... 10
2.2. Identifying Personnel Shortages Using Low-Retention MOSs ............................... 11
3.1. Generic Strategies for Helping Reduce Shortage MOSs ........................................ 17
3.2. How DL Might Help Reduce Shortage MOSs .................................................. 17
4.1. Surplus MOSs and Their Potential as a Source for Reclassification into 67T ................. 28
4.2. DL (TADLP) Versus AIT Course Characteristics: The Example of the 67T Reclassification Course ............................................................... 39
5.1. The Potential of Cross-Training and MOS Consolidation: The Example of CMF 67 ......... 53
5.2. DL (TADLP) Versus AIT Course Characteristics: The Example of the 67T Cross-Training Course ............................................................... 55
A.1. IPM Input Data and Sources ........................................................................... 70
A.2. Selected Baseline Inputs of CMF 67 .......................................................... 74
B.1. DL Redesign Effect on Length of Reclassification Courses: Early Results ................... 81
