Tables

5.1. Fraction of Competitive Programs Examined That Achieved Savings ........................................ xvii
2.1. International Participation in JSF CDP ......................... 18
3.2. Benefits and Drawbacks of Competition in Defense Acquisitions ........................................ 28
5.1. Options for Second-Source Participation During Production ................................................. 47
5.2. Airframe and Mission System Components in RAND Study ................................................. 48
5.3. EMD Equivalent Quantities and Cost-Improvement Curve Slopes Used in the Analysis .................. 49
5.4. Estimating Assumptions for Second-Source Airframe EMD Costs Under BTP Scenario .................. 51
5.5. Airframe Component Break-even Estimates .............. 52
5.6. Mission System Component Break-even Estimates ....... 52
5.7. Estimated Cost Savings from Competition in Electronics Systems and Equipment Programs ....... 54
5.8. Estimated Cost Savings from Competition in Missiles, Ships, and Related Programs ................ 55
5.9. Fraction of Programs Examined That Achieved Savings ........................................................... 57
5.10. Fraction of Programs Examined That Achieved Savings and Covered Nominal Loss of Learning .... 60
6.1. Degree of Contractor Influence over O&S Costs ............ 67
6.2. Percentage of Airframe and Mission Equipment
   Operations and Support Costs Represented by
   Consumables, Depot-Level Reparables, and Overhaul . . . . . . 69
6.3. Effect of Reliability Improvements on JSF
   O & S Break-even Percentages ................................. 72
7.1. Cost-Growth Data for Competitive Programs ............... 75
7.2. Cost-Growth Data for Noncompetitive Programs .......... 76
7.3. Simple Averages of Procurement
   Cost-Growth Factors. ......................................... 78
7.4. Simple Averages of Development
   Cost-Growth Factors. ......................................... 79
7.5. Companies Teamed with Boeing During CDP. ............... 88
7.6. Companies Teamed with Lockheed Martin
   During CDP. .................................................. 89
9.1. Production Savings Needed to Break Even on
   Investment in Shadow Competitor ......................... 102
