
TABLES

2.1.	Deployment Frequency Based on Poisson Distribution	11
4.1.	Distribution of Deployment by Service, First Term . . .	38
4.2.	Distribution of Deployment by Service, Second Term	39
4.3.	Average Number of Episodes	44
4.4.	Predicted First-Term Reenlistment Probability, Full- Interaction Model	46
4.5.	Predicted Second-Term Reenlistment Probability, Full-Interaction Model	47
4.6.	Simulated Increase in Hostile Deployments	52
4.7.	Effect on Reenlistment of Adding 25-Percent More Episodes, All Hostile	52
4.8.	Average Length and Standard Deviation of a Deployment	56
5.1.	Time in Service and Time in Grade Requirements for E-5	65
5.2.	Effect of Expected Time to E-5 Promotion on Reenlistment	69
5.3.	Error Correlation Between Time to E-5 Promotion and Reenlistment	71
A.1.	Deployment-Related Pays, 1995–1999	91
B.1.	Weighted Kappa Values for Episode Counts	95
B.2.	Distribution of FSA Payments in September 1997	96
B.3.	Estimate of Undercount of Months of Deployment per Episode	98
C.1.	Sample Means and Standard Deviation: First Term	99

C.2.	Sample Means and Standard Deviation: Second Term	100
D.1.	Main-Effect Probit Model of Reenlistment: First Term	104
D.2.	Main-Effect Probit Model of Reenlistment: Second Term	106
D.3.	Full-Interaction Probit Model of Reenlistment: First Term	108
D.4.	Full-Interaction Probit Model of Reenlistment: Second Term	109
D.5.	Main-Effect Probit Model of Reenlistment: First Term with No Dependents	110
D.6.	Main-Effect Probit Model of Reenlistment: First Term with Dependents	112
D.7.	Tobit/Probit Model of Time to E-5 Promotion and Reenlistment: First Term	114
D.8.	Tobit/Probit Model of Time to E-5 Promotion and Reenlistment: Second Term	118
