## PREFACE

This Note provides definitions for the codes used in the claims line-item files and aggregated claims files, collectively known as the "claims files" of the Health Insurance Experiment (HIE). The HIE was a large social experiment conducted by The Rand Corporation from 1974 to 1982 under a grant from the U.S. Department of Health and Human Services, Washington, D.C.

The codes contained herein were taken from coding sources cited in each section. Only the codes used by the HIE are provided in this volume. Some supplementary codes were added to existing codes under the direction of a Rand HIE physician to describe conditions or services not reflected by the existing codes. A few codes were entirely created by the HIE, as stated in the appropriate sections.

# I. DIAGNOSIS CODES USED IN THE HIE CLAIMS FILES

Diagnosis codes were taken from the *Hospital Adaptation of the ICDA (International Classification of Diseases Adapted for Use in the United States)*, 2nd Edition (H-ICDA-2), Commission on Professional Hospital Activities, Ann Arbor, September 1973. Starred codes are supplementary codes created by a Rand HIE physician.

## V. NATIONAL DRUG CODES USED IN THE HIE CLAIMS FILES

Drug codes were taken from the *National Drug Code Directory*, Public Health Service, U.S. Department of Health and Human Services, Washington, D.C., June 1972. Supplementary drug codes were created by the HIE and are not distinguished from standard NDCD codes here. Codes lacking definitions are coding errors.
