## Solar System Science: 1962 Literature Survey, Part IV

EDNA O'CONNELL

*The RAND Corporation, Santa Monica, California*

Communicated by DONNA WILSON

In Part IV of the 1962 solar system literature survey, we have cited papers from the various miscellaneous journals and corporation publications which pertain to our subject. The requirement for completeness cannot be the same as in the case of serial publications. We list the sources included below, however, this list does not signify that we have searched all of the publications of each one. Complete indexes of these miscellaneous publications have not been available.

Readers are invited to send literature of this subject to the bibliography editor for citation in *ICARUS*. We also continue to welcome your suggestions and comments for improving the bibliography.

### ACKNOWLEDGMENTS

The literature survey has been supported by the U. S. Air Force and the National Aeronautics and Space Administration.
