Fostering Innovation in the U.S. Court System

Identifying High-Priority Technology and Other Needs for Improving Court Operations and Outcomes

Technology and Practice Taxonomy—Courts

Brian A. Jackson, Duren Banks, John S. Hollywood, Dulani Woods, Amanda Royal, Patrick W. Woodson, Nicole J. Johnson
NOTE: This taxonomy was developed to capture the full range of technologies used in the law enforcement, courts, and corrections sectors. As a result, it includes categories that are not relevant to all agencies and entities across all three sectors. In this figure, categories that are faded out are those where court-relevant technologies were not identified, but they are included to maintain consistency with the similar analyses for law enforcement and corrections.
