This report summarizes the strategic planning process in support of the government of Puerto Rico in its development of a congressionally mandated recovery plan. Nearly 300 potential recovery actions were developed that Puerto Rico could take to repair damage from Hurricanes Irma and Maria and address longer-term economic recovery needs.

RESEARCH QUESTIONS

- How did HSOAC develop an array of potential courses of action that Puerto Rico could pursue to repair damage from the hurricanes and address longer-term economic recovery needs?
- What core steps did HSOAC take to support development of the recovery plan, especially how the courses of action were developed and how they were used in the plan development process?

HSOAC is a federally funded research and development center (FFRDC) operated by the RAND Corporation under contract with the U.S. Department of Homeland Security (DHS). The HSOAC FFRDC provides the government with independent and objective analyses and advice in core areas important to the department in support of policy development, decisionmaking, alternative approaches, and new ideas on issues of significance. The HSOAC FFRDC also works with and supports other federal, state, local, tribal, and public- and private-sector organizations that make up the homeland security enterprise. RAND is a research organization that develops solutions to public policy challenges to help make communities throughout the world safer and more secure, healthier and more prosperous. RAND is nonprofit, nonpartisan, and committed to the public interest. For more information, visit www.rand.org/hsrd/hsaac.
