ABSTRACT

The Los Angeles Family and Neighborhood Survey (L.A.FANS) is a longitudinal study of families in Los Angeles County and of the neighborhoods in which they live. This document describes the telephone questionnaires that were used in Wave 2 of L.A.FANS. Fieldwork for the second wave took place between August 2006 and December 2008. L.A.FANS was designed to answer key research and policy questions in three areas: the effects of neighborhoods and families on children's development; the effects of welfare reform at the neighborhood level; and the process of residential mobility and neighborhood change. L.A.FANS also provides a data set for studying other important social, economic, and policy issues, including: adult health and health disparities, immigrant well-being, social ties and neighborhood interaction, marriage patterns, ethnic identity, family survival strategies, family dynamics, health insurance coverage, and self-reported vs. measured health status.

PREFACE

The Los Angeles Family and Neighborhood Survey, Wave 2, was funded by grants from the Eunice Kennedy Shriver National Institute of Child Health and Human development (Grants R01 HD035944 and R01 HD049865), the National Institute of Aging (Grant R01 AG022005), and the National Institute of Environmental Health Sciences (Grant R01 ES13907). Additional funding was provided by the National Institutes of Health's Office of Behavioral and Social Science Research, the Health Resources and Services Administration of the U.S. Department of Health and Human Services, and the Russell Sage Foundation. The L.A.FANS project is very grateful to these sponsors for their financial and other support throughout the design, planning, and conduct of the Wave 2 survey.

ACKNOWLEDGMENTS

The telephone questionnaires for L.A.FANS-2 were primarily modified versions of those for household questionnaires for L.A.FANS-2 which, in turn, were based on the L.A.FANS-1 questionnaires. Please see the acknowledgements in the L.A.FANS-1 Household Questionnaires documentation (<http://www.rand.org/pubs/drafts/DRU2400.3-2/>) for a description of the roles of the project team in designing the L.A.FANS-1 questionnaires. Development for the L.A.FANS-2 telephone questionnaires was led by Anne Pebley (UCLA and RAND; L.A.FANS-2 Co-Director) and Christine Peterson (RAND; L.A.FANS-2 Data Manager), with advice from Narayan Sastry (University of Michigan and RAND; L.A.FANS-2 Co-Director), Rachel Veerman (UCLA), and Karen Yuhas (RAND; L.A.FANS-2 Project Director). Rhonda Moats (University of Michigan) edited and formatted the questionnaires for this publication.

1. INTRODUCTION

The Los Angeles Family and Neighborhood Survey (L.A.FANS) is a longitudinal study of families in Los Angeles County and of the neighborhoods in which they live. L.A.FANS was originally designed to answer key research and policy questions in three areas: the effects of neighborhoods and families on children's development; the effects of welfare reform at the neighborhood level; and the process of residential mobility and neighborhood change. L.A.FANS also provides a data set for studying other important social, economic, and policy issues, including: adult health and health disparities, immigrant well-being, social ties and neighborhood interaction, marriage patterns, ethnic identity, family survival strategies, family dynamics, health insurance coverage, and self-reported vs. measured health status.

The first wave (L.A.FANS-1), which was fielded between April 2000 and January 2002, interviewed adults and children living in 3,085 households in a diverse stratified probability sample of 65 neighborhoods throughout Los Angeles County. In Wave 2 of L.A.FANS, we attempted to reinterview in person all primary respondents from Wave 1 who were residing in Los Angeles County, whether or not they continued to live in their Wave 1 neighborhoods. In addition, we interviewed a sample of individuals who moved into each sampled neighborhood between Waves 1 and 2. The telephone questionnaires contained in this document were administered to Wave 1 L.A.FANS respondents who, at the time of Wave 2, were residing outside of Los Angeles County. Fieldwork for the second wave of L.A.FANS took place between August 2006 and December 2008.

Telephone Module

The Telephone Module collected basic information from a panel respondent who lived outside of Los Angeles County or from another co-resident adult household member about himself/herself as well as: (a) proxy information about other panel respondents who lived in the same household and (b) limited characteristics and contact information for panel respondents who did not live in the household. The Telephone Module was derived from the Wave 2 Roster Module that was completed as part of the in-person interview for respondents residing in Los Angeles County.

Telephone Module Respondents

Although all panel respondents residing outside of Los Angeles County were eligible for a Wave 2 interview (by telephone), only a single telephone interview was required for a group of panel respondents residing together. In other words, if multiple panel respondents all resided together outside of the county, only a single telephone interview was to be completed with this household. There was a preference for completing the telephone interview with an adult sampled individual (Panel Randomly Sampled Adult or Panel Child 18+ years of age) or with the Wave 1 Primary Caregiver, but any other adult member of the household was also eligible to complete the interview.

The key point regarding the respondent selection procedure for individuals outside of Los Angeles County at Wave 2 is that there is essentially no distinction between self-reports and proxy reports. Rather, the information collected for these panel individuals outside the county was the same regardless of who was interviewed. We anticipated that response rates would be higher and the information collected more complete if we sought to interview, by telephone, only one respondent in each household. The specific questionnaire topics are all focused on obtaining an update of the panel respondents' status at Wave 2, and the nature of this

information means that there is little reason to expect a difference in the quality or completeness of reports according to which individual in the household completed the interview. Furthermore, similar information on panel respondents outside of Los Angeles County was obtained from rosters completed in person by other members of the person's Wave 1 household who resided in the county. Thus, obtaining a Wave 2 update—from any source—on panel respondents residing outside the county is the relevant outcome indicator for these individuals.

In most cases, the Wave 2 update for panel respondents outside of Los Angeles County was obtained from the panel respondent himself or herself, the respondent's (adult) child or parent or spouse, the Wave 1 PCG, another Wave 1 household member, or another Wave 2 household member. For a small number of cases, an "informant" served the role of a Wave 2 proxy respondent for a panel individual. This most commonly occurred in situations in which the person was deceased, institutionalized, physically or mentally disabled, or incarcerated at Wave 2 and had lived alone at Wave 1.

TELEPHONE QUESTIONNAIRE-UPDATE ROSTER

QUESTIONNAIRE FOR HOUSEHOLDS OF PANEL RSA, PCG, RSC, & SIB RESPONDENTS WHO LIVE OUTSIDE OF LOS ANGELES COUNTY

Preloads:

- Wave 1 Roster (names, sexes, roster IDs, ages, and birthdates where available of all residents from W1 roster; flags for whether person was RSA-P, RSC-P, SIB-P, PCGW1, or other). Note that roster list should also include any new names (i.e., name changes) we know about from the ITS or tracing operations as well as original W1 names.
- Whether sampled RSA-P, RSC-P, PCGW1, or SIB-P were interviewed in W1.
- Whether W1 respondent was ever married at W1 (W1_EVERMARR:=1 if ever married, 0 if never married).

Notes:

- Eligible households are those in which one or more of the three panel respondents (RSA-P, RSC-P, SIB-P) lives.
- The order of preference for Telephone Questionnaire Update Roster respondents is: RSA-P, PCG_W1 if both RSC-P and SIB-P are ≤17 years old, RSC-P if ≥18 years of age, SIB-P if ≥18 years of age, then the current PCG of the RSC-P and / or SIB-P. If none of these respondents can be contacted, the Telephone Questionnaire Update Roster can be completed by another adult (age ≥18 years) who lives in the household, as long as the interviewer is sure that one (or more) of the panel respondents lives in the household at this phone number.
- Set UR and CR indicators for whether Telephone Update roster and Current roster are to be done. Detailed Telephone UR questions are asked only for W1 respondents not yet located and interviewed (i.e., when RSAP_INTER=0 or RSCP_INTER=0 or SIBP_INTER=0) and for the PCG_W1, if he or she has not yet been found and interviewed (i.e., PCGW1_INTER=0). Note that the PCG_W1 only is interviewed if he / she is still the current PCG of panel children. However, we want to know where the PCG_W1 is, so we will collect this information in each Telephone Roster done for people in the W1 HH, even if we sometimes ask the same question about the PCG_W1 in two or more Rosters. Also, note that even if we think we have located the respondent (but not yet interviewed him), we still collect information on him / her to make sure we have all information we can get, in case the information we already have is incorrect.
