

**Section C: Perceptions About Therapies**

TIME THIS SECTION BEGINS RECORDED HERE  
TSST13C

Now we'd like to ask you how you feel about different approaches to treating HIV infection.

C1. Let's start with antiretroviral drugs, such as AZT, ddl and ddC. Considering both the benefits and the risks of taking antiretroviral therapies, would you say that for you they are:

**B13C01**

**(Circle One)**

- Definitely worth taking, ..... 1
- Probably worth taking, ..... 2
- Probably not worth taking, or ..... 3
- Definitely not worth taking? ..... 4

C2. How about drugs that are taken to prevent *Pneumocystis pneumonia* or PCP? Considering both the benefits and the risks of taking anti-PCP drugs for prevention, would you say that for you they are:

**B13C02**

**(Circle One)**

- Definitely worth taking, ..... 1
- Probably worth taking, ..... 2
- Probably not worth taking, or ..... 3
- Definitely not worth taking? ..... 4
