

# **Data Alert for RAND HRS Family Data 2018 (V1) (July 2023)**

We released the RAND HRS Family Data 2018 (V1) in June 2023.

A RAND HRS user discovered a miscoded measure HwLVNEAR, which categorizes how near a Respondent's closest child lives. This error affects the Respondent data file, randhrsfamr1992\_2018v1.

We have replaced the V1 files with a corrected data package, randhrsfam1992\_2018v2, which includes the corrected Respondent file and updated codebook. The Respondent-kid file remains unchanged but is designated as V2 for consistency within the set of files.
