Research to Support Fifth Report of the Gilmore Commission

In Progress

• Strategic Vision
• Survey
• Intelligence assessment
• Communications Interoperability
• Assessment of DHS
• Burden sharing
• Civil liberties
• Monitoring changes in military organization, planning, training, etc. for homeland security

Other

9. R&D
10. Health and medical
Intelligence Assessment

- Identify the key recommendations of the Gilmore panel, the House-Senate Inquiry, and others
- Examine British, French, and Australian experiences in organizing their domestic intelligence structures for combating terrorism.
- Analyze the TTIC and FBI initiatives and assess whether these reforms address the shortfalls identified by the panel and others, and whether these initiatives incorporate relevant lessons from other democracies
Communications Interoperability

• Summarize the sources of and potential solutions for communications interoperability problems during multi-agency response operations
  • Technical issues
  • Policy/procedural concerns
• Examine current initiatives or programs
• Develop alternative approaches
DHS Assessment

• How effective has DHS been in achieving its primary objectives?
• How effective has DHS been in achieving the objectives recommended by the Gilmore Commission?
• How has the creation of DHS affected the preparedness of state and local first responders?
Potential Research

- Health and Medical?
- Other?
